Right-size Package Design

- Cape calculates optimal product fit and arrangement
- Secondary package design automatically created based on Cape calculations
- Primary product is arranged in the packaging as defined by Cape

Hundreds of Resizable Display Designs Ready for Production

Welcome to the ArtiosCAD Display Store. Here you will find a continually expanding choice of resizable, production ready, 3D designs that react quickly to design requests and satisfy the needs of your customers.

Each resizable design will save you hours of expensive labor in design time and material waste in production testing. We do it for you!

- Downloads include...
- A resizable ArtiosCAD 2D production ready drawing to use over and over again at a fraction of the cost of creating a design from scratch!
 - An ArtiosCAD 3D drawing which contains no glue points for easy assembly, and can be used for dynamic quality inspection and evaluation.
 - A 3D PDF file that becomes a fully interactive 'virtual sample' you can share with your colleagues and customers.
 - A 3D JPG image file complete with detailed report template.

Cascading & Multi-Value Attributes

The screenshot displays the ESKO software interface. The main window shows project information for 'RIDER_Cascading_Attributes' with a status of 'Briefing'. The project details include: Manager: Deroo, Richard (RIDR); Customer: Esko/Belgium; Due On: Jun 30, 2016; Modified: Jun 6, 2016; Project of (Campaign): 16 Test; Category: Beverage; Brand: Get Set; Product: Energy Drink | Energy Gel. The 'Attributes' tab is active, showing 'Attributes in Category RIDR_BO_Packaging' and '1) SKU Details'. The 'Product' field is highlighted with a red box and contains the multi-valued text 'Energy Drink | Energy Gel'. A red arrow points from this field to a 'Project information' dialog box. The dialog box shows the same project details and has the 'Product' field also highlighted with a red box, containing 'Energy Drink | Energy Gel'. A green callout box with the text 'multi-value attributes' is connected to the red boxes by red lines. The bottom right corner of the dialog box shows a table with columns 'Attribute' and 'Value', where the 'Product' attribute is listed with the value 'Energy Drink | Energy Gel'.

Eliminate defaults
for every
version and language

Single shared
defaults to
manage

Faster and easier upgrades for Admins

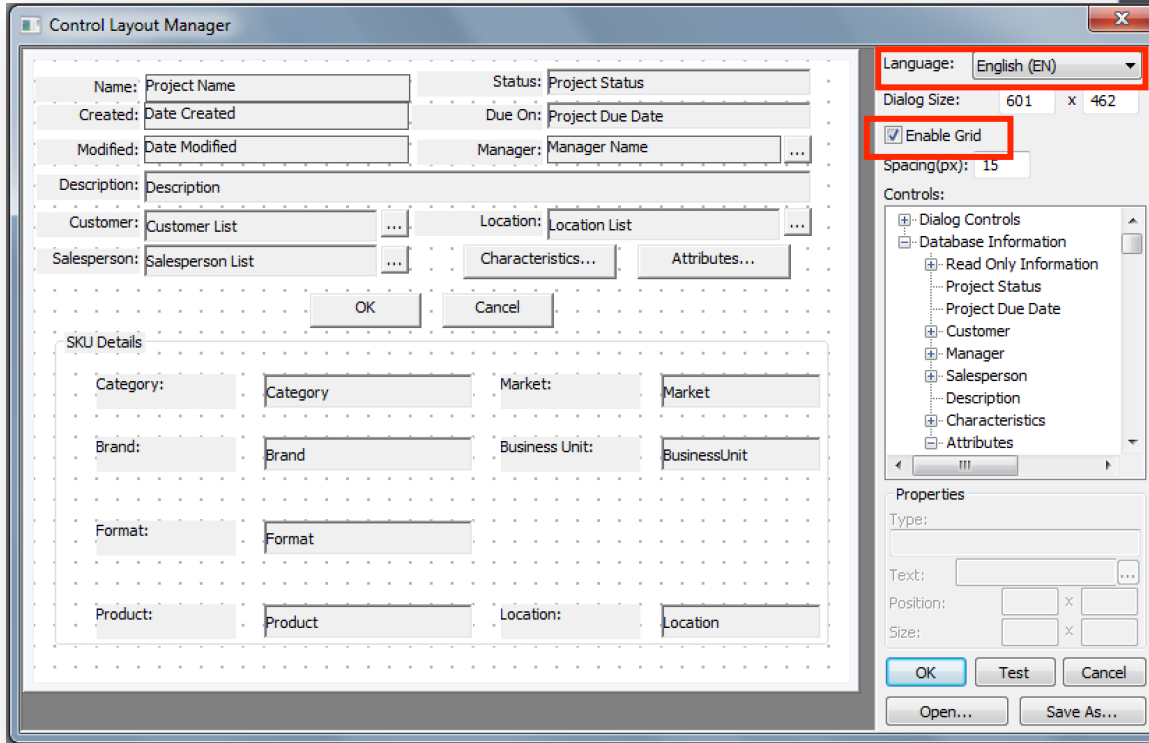

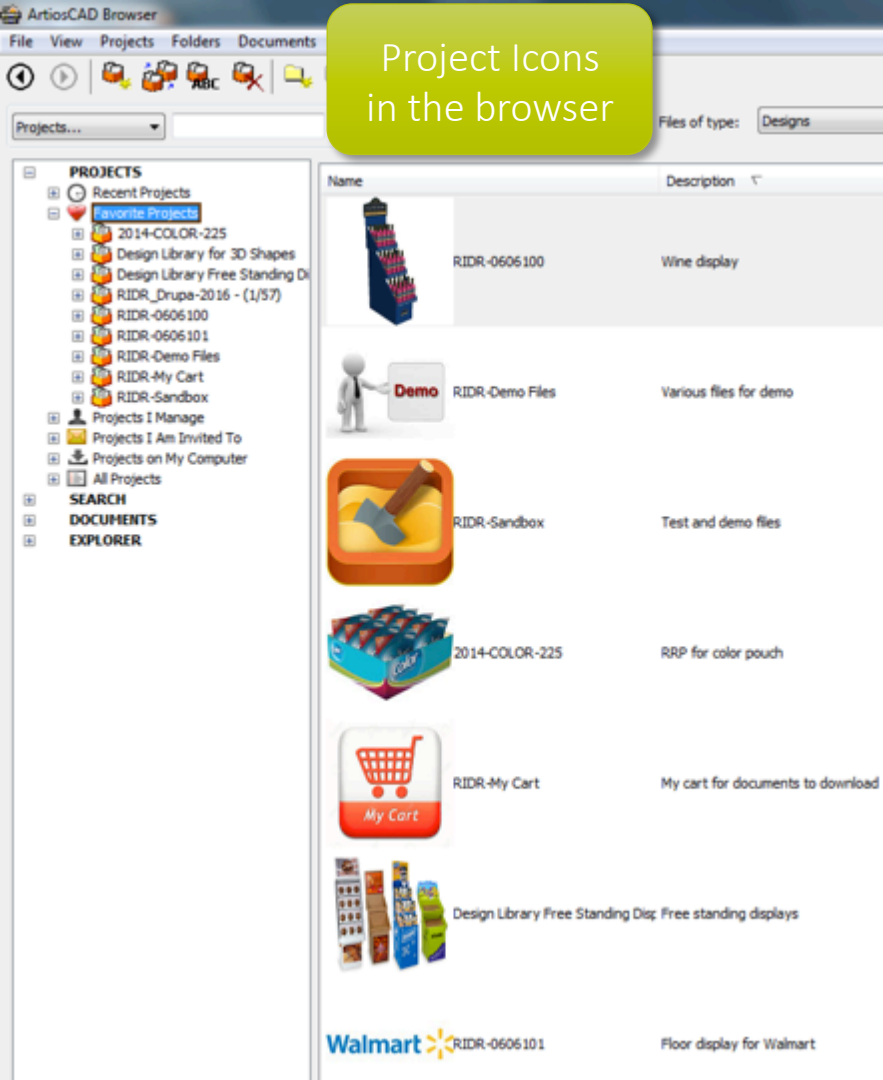

- Defaults are no longer version specific
- Defaults are no longer language specific
- Upgrades will add new settings only

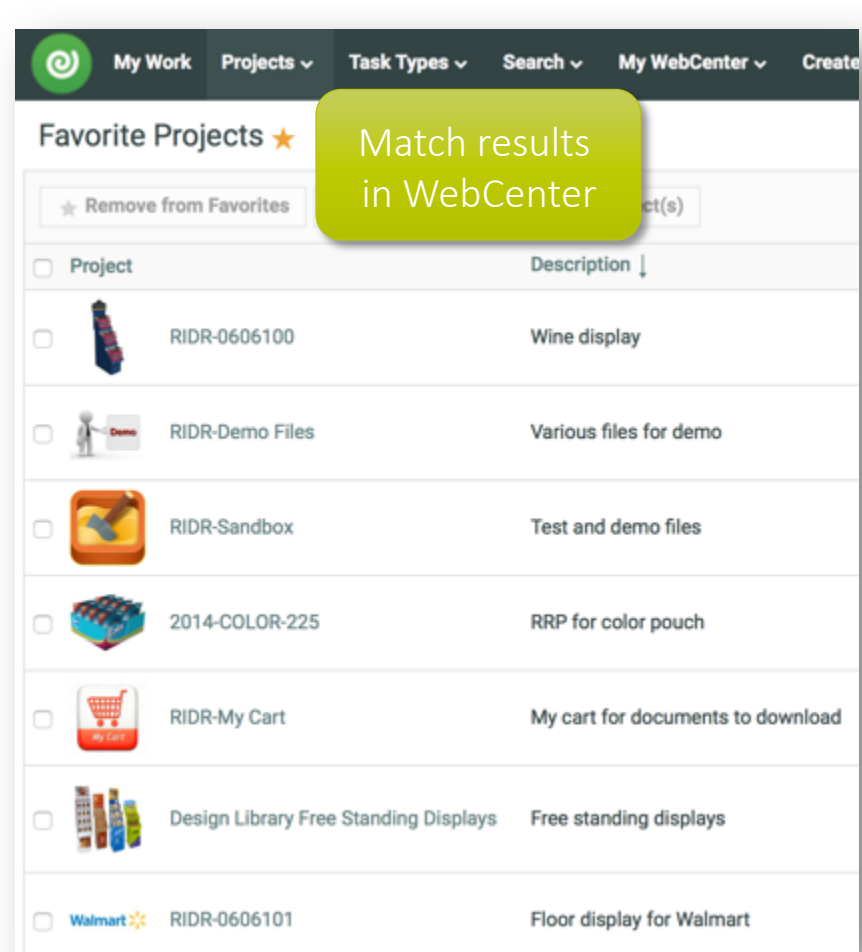

Faster and easier customizing for Admins

- New grid layout for easy alignment
- Grid snap points speed up form creation
- Support for mult-language dialog customization
