

## Changelog ArtPro Version 16.0.1 (build 248)

This is a non-exhaustive list of issues fixed in ArtPro 16.0.1.

Note that if you have specific issues you would like to discuss with us, you can contact your local Esko support department.

NEW	Staggered Cut: Now supports separation based staggered cut
CS00647535 CS00663119 CS00663517 CS00653957 CS00656401 CS00659807 CS00673094 CS00647762 CS00650363 CS00647762 CS00652611 CS00664353	All fixes included in hotfix build 111: Fixes for Export PDF (with Exclude separations) Fixes for font (outline) recognition Fix for a performance issue Fix for missing links in the images list Fix for Equinox
Font Outline Check	Additional fix for the font outline issues: You can now also hold the Shift key while clicking the Accept All Live Text button. If a file was saved in ArtPro 16.0 (build 109-110) the text outlines may not have been saved correctly for all characters, hence triggering a text outline check. If Accept Live Text does not show the characters as expected, you can Undo, Recalculate and try Accept All Live Text while holding the Shift key for an alternative calculation.
CS00683283	Save: Fix for issues saving files from certain workstations to a file server
CS00699221 CS00656795 CS00671142	Export PDF: Additional fixes for separated PDF and for missing halftone information for patterns (Normalized PDF)
CS00674482	Export PDF: We now avoid adding bitmap images during export
CS00672497 CS00676971	Images: Fix for issue with resolution of JPEG images (resolution different from 300dpi)
CS00670549	Images: Better support for multichannel PSD
CS00638454	Images: Fix for issues replacing certain images (soft masks)
CS00674482	Ink books: Fix for missing inks in ink books
CS00698277 CS00650412	Trapping: Fix for crash when Close small gaps was enabled
CS00665593	Import PDF: If CMYK values are not available for a spot color, we look for the ink in the ink book.
CS00658628 CS00676405 CS00658628	Import PDF: Fix for import of specific shadings
CS00652716	Import PDF: Fix for import of transparency groups with blend modes applied
CS00676234	Shortcuts: Fix for focus/input issues when using single key shortcuts
CS00681084	Text Style: Better indication if the selected text uses different fonts settings

CS00643304	View: Actual Size corrected for retina displays
CS00654560	Ruler: When Ruler is moved, position information is updated again
CS00639304	Barcode: Fix for input of GS1 Databar Expanded
CS00667312	Vectorize: Drag & drop on Import > Vectorize palette is working again
CS00631750	ArtPrinter: Fix for crashes when opening multiple documents
CS00662695	PostScript: Fix for issue with calfiles in PostScript files on Nexus RIP

## Changelog ArtPro Version 16.0.0 (build 110)

This is a non-exhaustive list of issues fixed in ArtPro 16.0.0.

Note that if you have specific issues you would like to discuss with us, you can contact your local Esko support department.
