

ArtPro 18

What's New

Frank Woltering

Product Manager PDF Editors

November 2018

64-bit Application

- ArtPro, PowerLayout and ArtPrinter 18 are now future-proof 64-bit applications, supported on macOS High Sierra (macOS 10.13) and Mojave (macOS 10.14)

- Some remarks and limitations:

- Contone Editing (ArtColor) is not available in this version. Opening of ArtPro files with existing Contone images is fully supported.

You can continue using the ArtColor module in ArtPro 16.1.1. Contact your local sales rep for more information about migration to the DeskPack for Photoshop plug-ins.

- The Preflight Profile Editor is not available in this version. You can use the built-in Enfocus Preflight Editor in ArtPro+. ArtPro and ArtPro+ can be run on the same workstation using your ArtPro license, no additional license is required.

64-bit Application

- Some remarks and limitations:
 - Viewer Compare is not available in this version. ArtPro+ has a Quality Control Compare tool that can be used to compare files. ArtPro and ArtPro+ can be run on the same workstation using your ArtPro license, no additional license is required.
 - Structural Design 'Import from Shapes' is not available in this version. Shapes can be downloaded via the free Data Exchange plug-in for Adobe Illustrator.
 - Step & Repeat 3D View (ArtRender) is not available in this version. You can continue using the ArtRender module in ArtPro 16.1.1

ArtPro Action List 'Modify Screen'

- A new option is available in the Modify Screen ArtPro Action List that allows to use the screening parameters defined in the one-up

Read ArtPro+ Station Number

- ArtPro+ allows to add station number placeholders in the one-ups.
Both the position and rotation of these station number placeholders can now be picked up by ArtPro and by the 'Set Station Number' Action in the ArtPro Action Lists by enabling the 'Get from single file' check box.
