

## Changelog ArtPro Version 20 (build 10009)

This is a non-exhaustive list of issues fixed in ArtPro 20.

Note that if you have specific issues you would like to report, you can contact your local Esko support department.

What's New	ArtPro 20 and PackEdge 20 are using ArtPro+ 20 licenses to run. As a result, with a license for ArtPro+ 20 you can freely choose what editor to use: PackEdge Basic is allocating an ArtPro+ Essentials license. ArtPro Classic Basic is allocating an ArtPro+ Essentials license. Any of the major modules PowerTrapper, PowerLayout or PowerStepper will upgrade an ArtPro+ Essentials to ArtPro+ Advanced. When purchasing an additional seat of a classic editor (PackEdge or ArtPro), you will receive an ArtPro+ license that will allow you to run either of these three editors. For more information on version compatibility please visit following knowledge base article: <a href="#">KB289711377: Classic Editors version 20 - Upgrading ArtPro or PackEdge to version 20</a>
CS01257709 CS01272410 CS01243654 CS01228513 CS01225741	Shortcuts: Fixes related to the use of certain shortcuts in a particular sequence, or shortcuts in general when keyboard layout is not set to US (qwerty)
