

ArtPro+ 14.0.1

What's New

13.11.2014

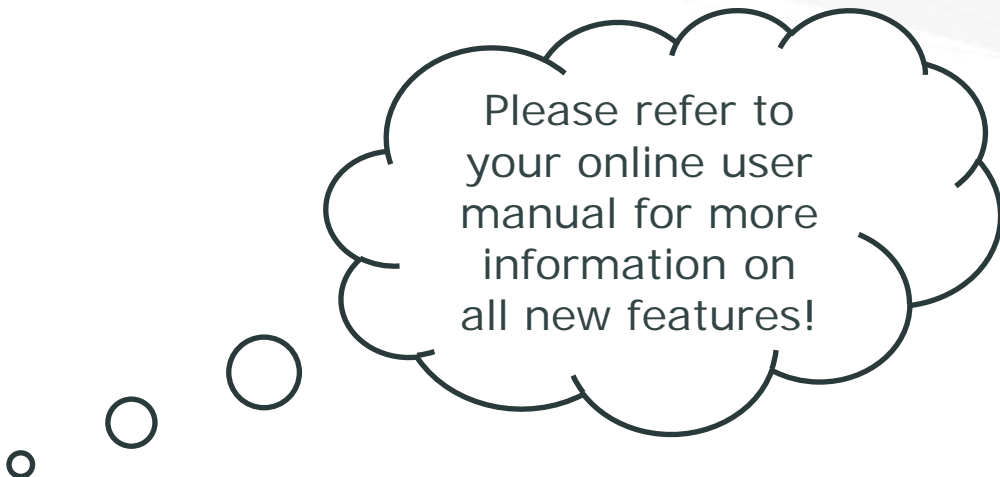

Frank Woltering

Product Manager Interactive Premedia Applications

ArtPro+ 14.0.1

Introducing

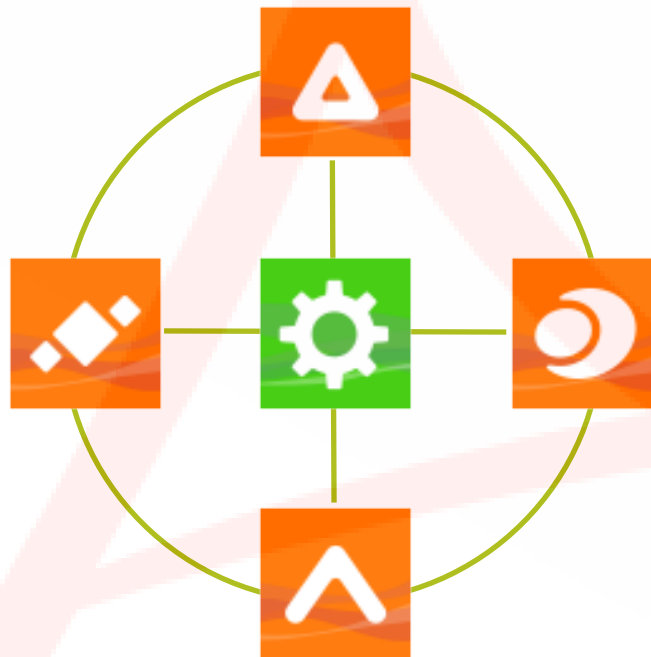

- Outline view mode
- Group and object selector
- Crosshair
- Transformations
- Arranging objects
- Breadcrumbs
- Cut, Copy and Paste
- Groups
- Compounds
- Manage layer printability

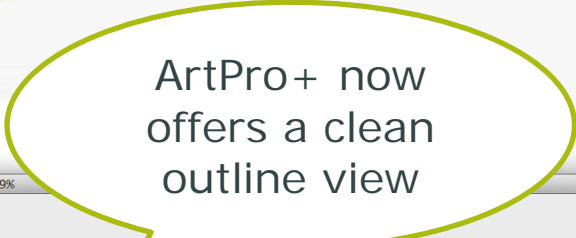

Please refer to
your online user
manual for more
information on
all new features!

Normalized PDF

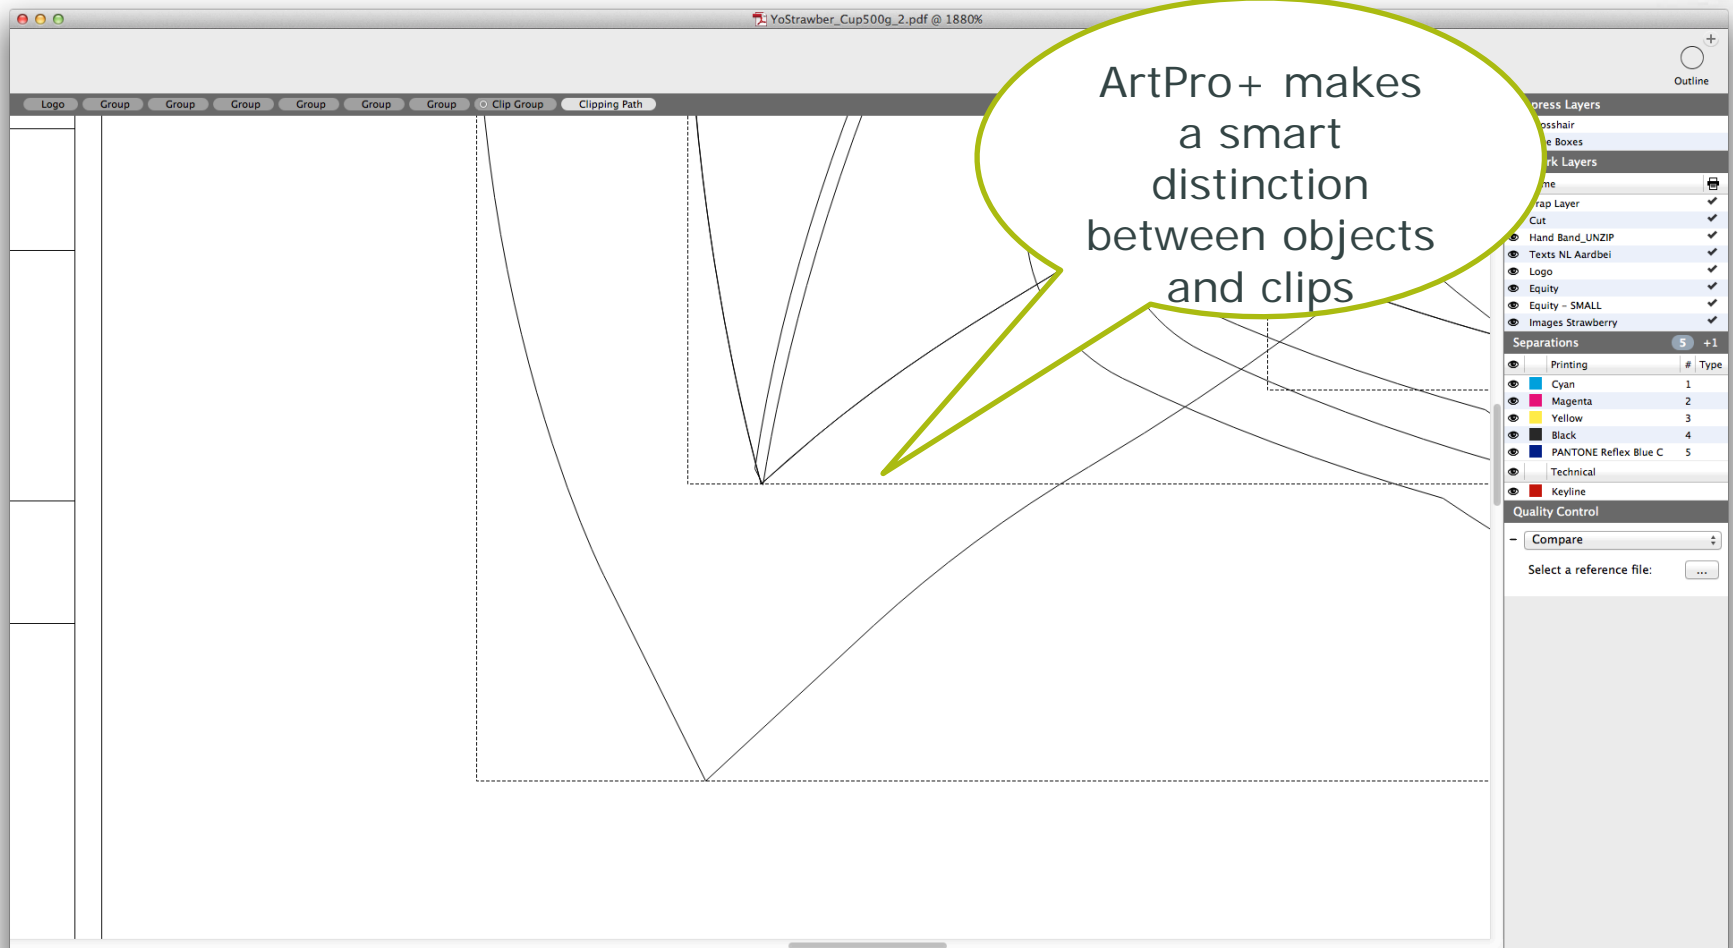

- ArtPro+ supports Esko Normalized PDF
 - Open any Esko Normalized PDF for editing.
 - Saving the file will maintain all packaging hi-level data such as ink-order, barcodes, object based screening, etc.

ArtPro+ now offers a clean outline view

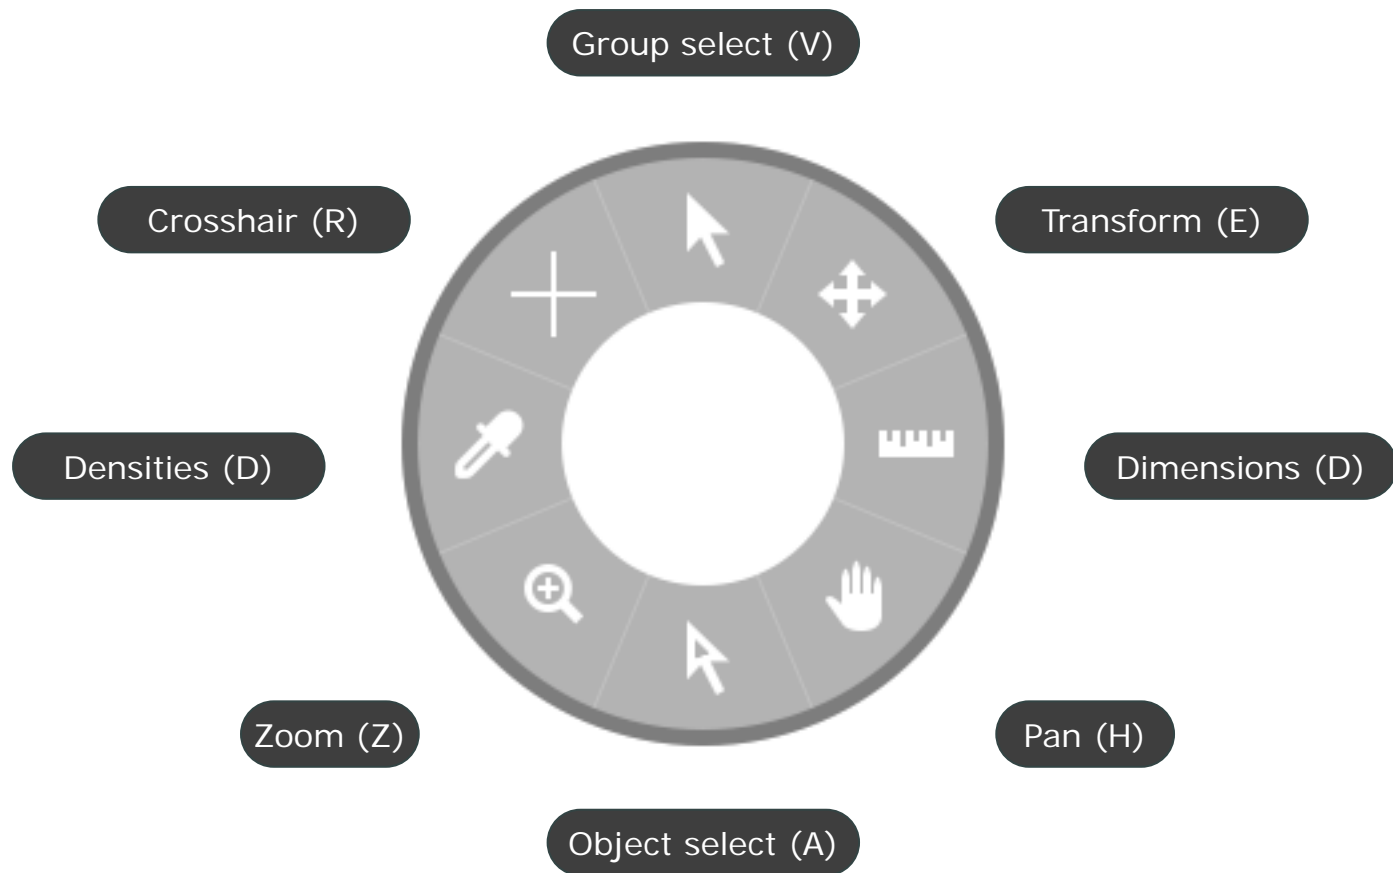

Outline view mode

No doubt about what object influences the appearance

The new tools

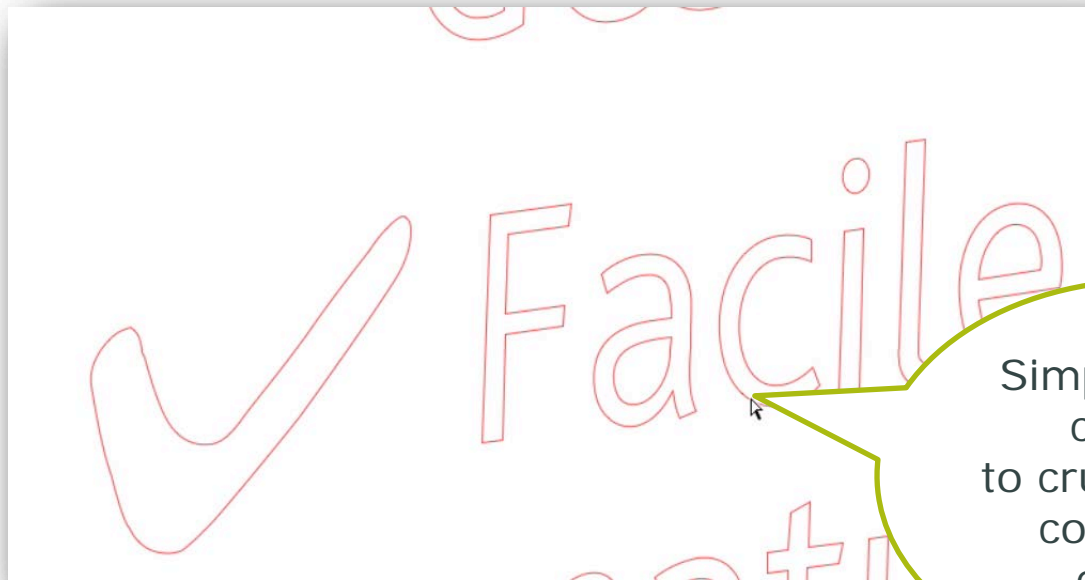

The selectors

- Group Selector
 - Selects the top-level group of the objects

The selectors

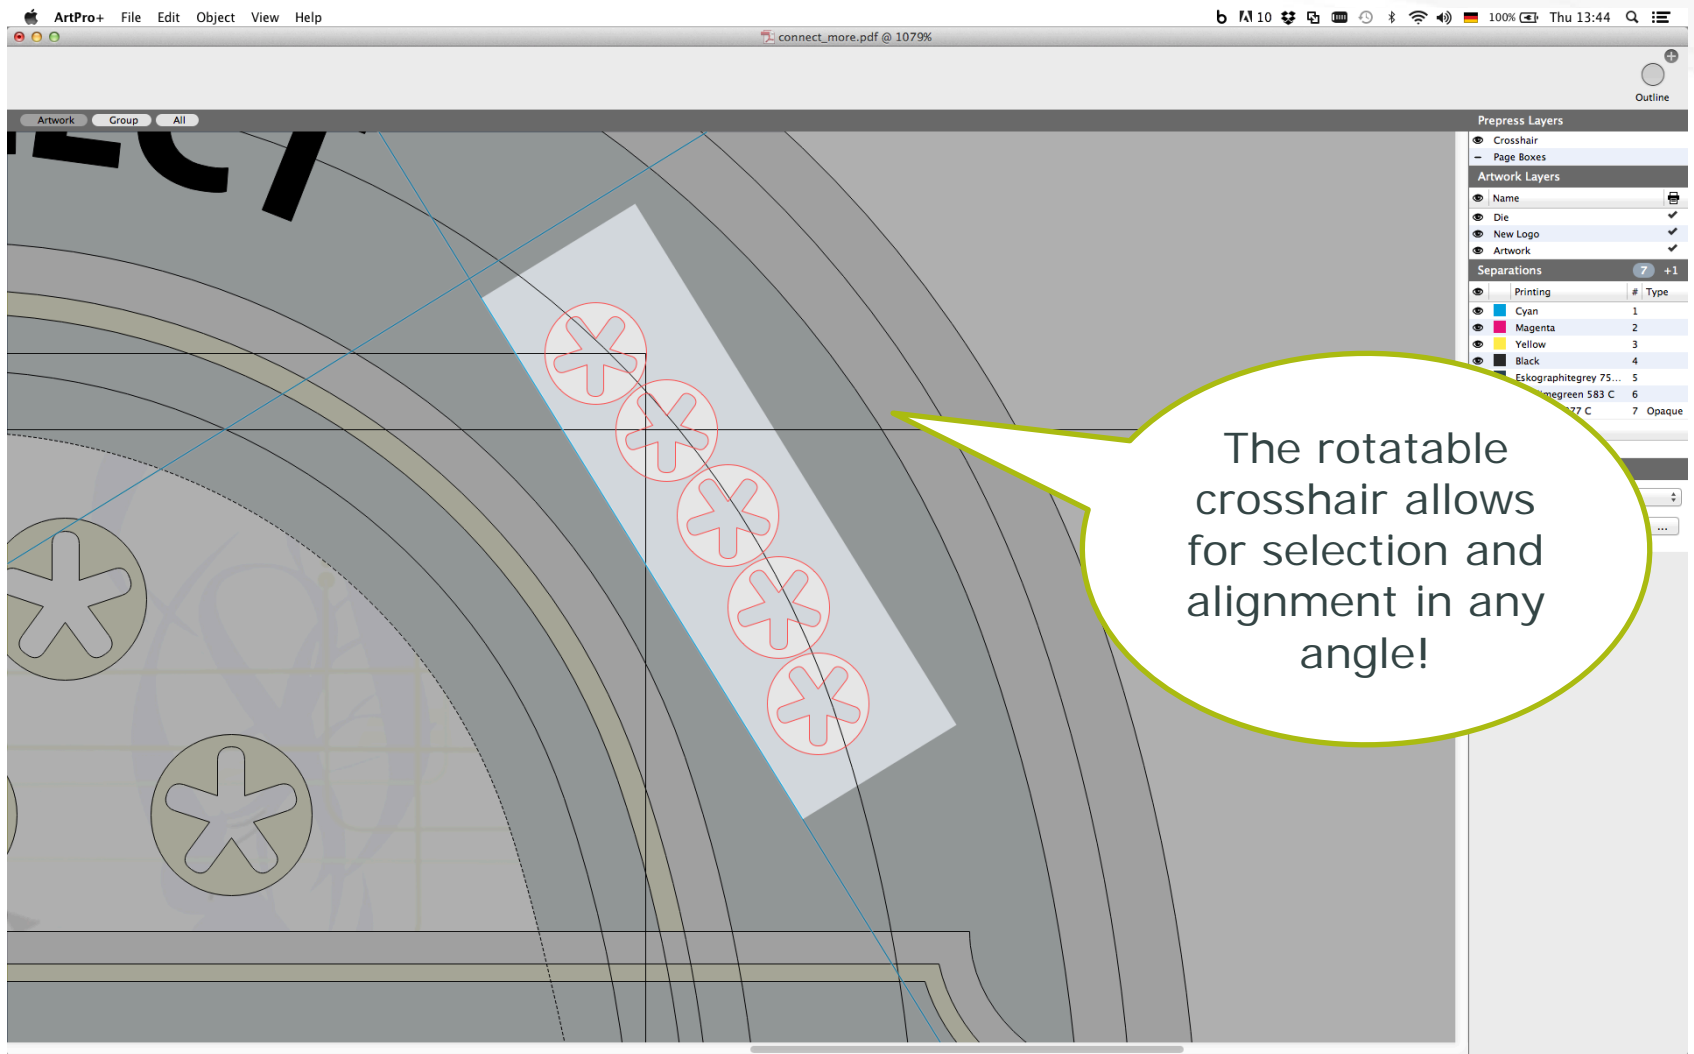

- Object Selector
 - “+” indicates that the object is member of a group
 - a simple click to easily expand your selection across parent layers

3

Simply repeat clicking to cruise up the containing groups

Crosshair

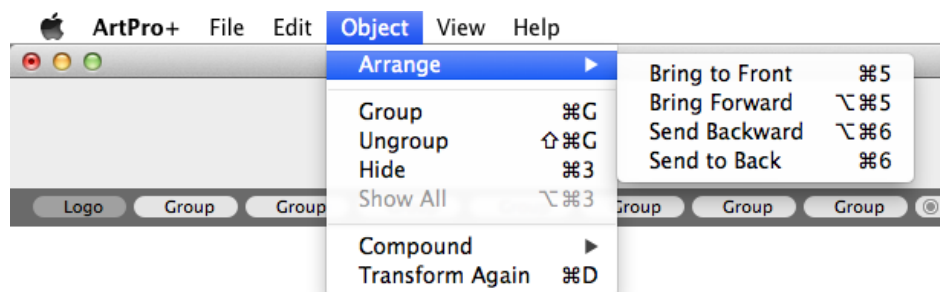

Transformations

Arranging objects

- Easily arrange objects

- Cut, copy or past
 - Paste in front of your selection (!)
- Group or ungroup objects

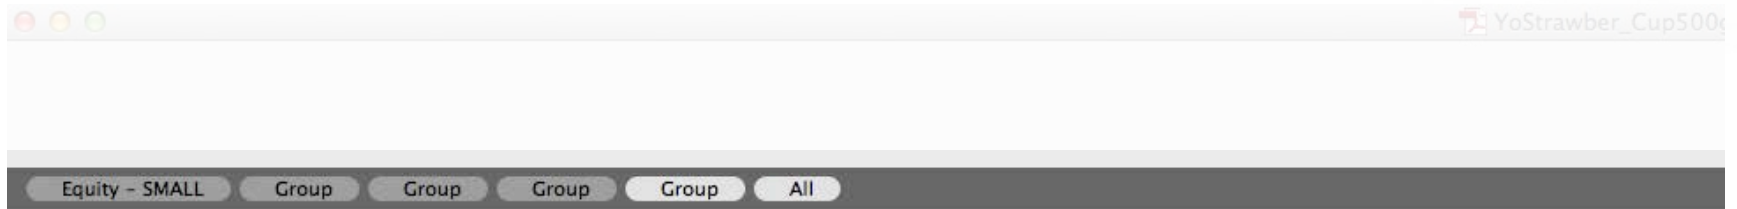

Compounds

- Compound or uncompound paths

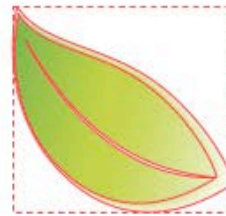

The breadcrumbs

The breadcrumbs

Simply click on
breadcrumb to
select parent
level group!
