ESKO

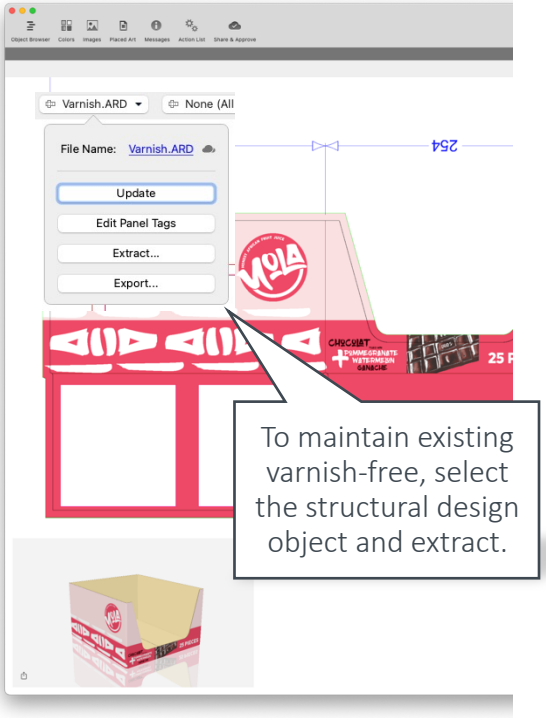
Export Varnish-Free Areas to ARD

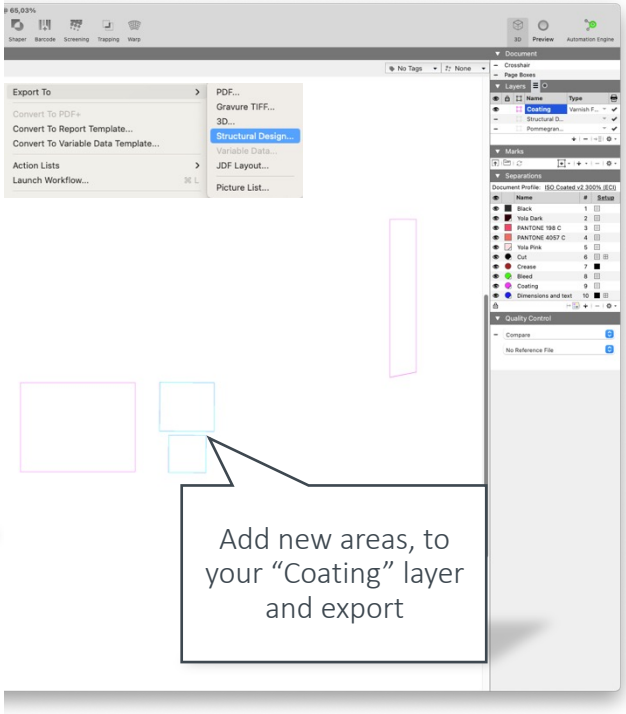
Use structural information to automate prepress

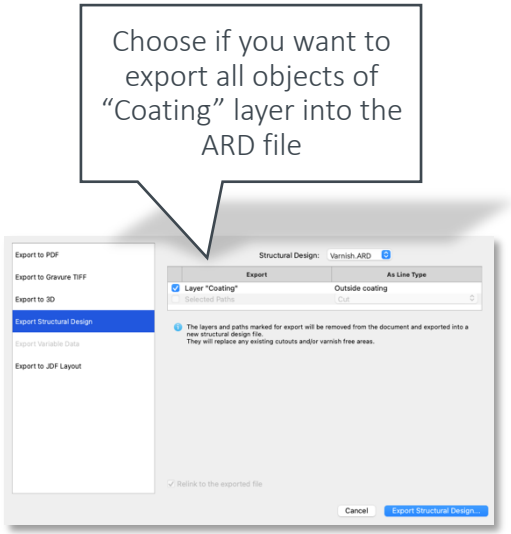
ESKO

Adding Varnish-Free Areas to Structural Designs

- To provide additional varnish information back to the structural designer, ArtPro+ offers the ability to add such areas and export the result to native ARD files







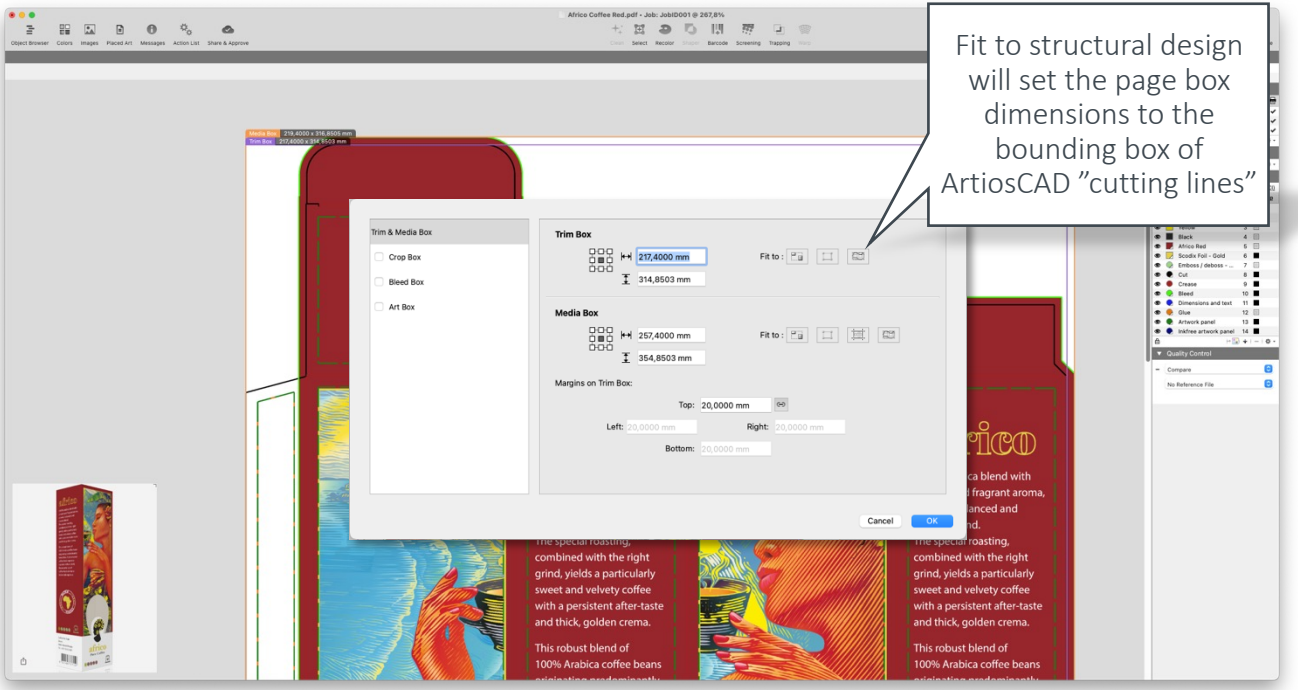
Fit Page Box to Structural Design

Use structural information to automate prepress

ESKO

Fit Page Box to Structural Design

- With a single click you can now adjust any page box to follow the net blank size



Warping Better Matching Conical Die Lines

In-mould pre-distortion – with one click

ESKO

Warping better matching Conical Die Lines

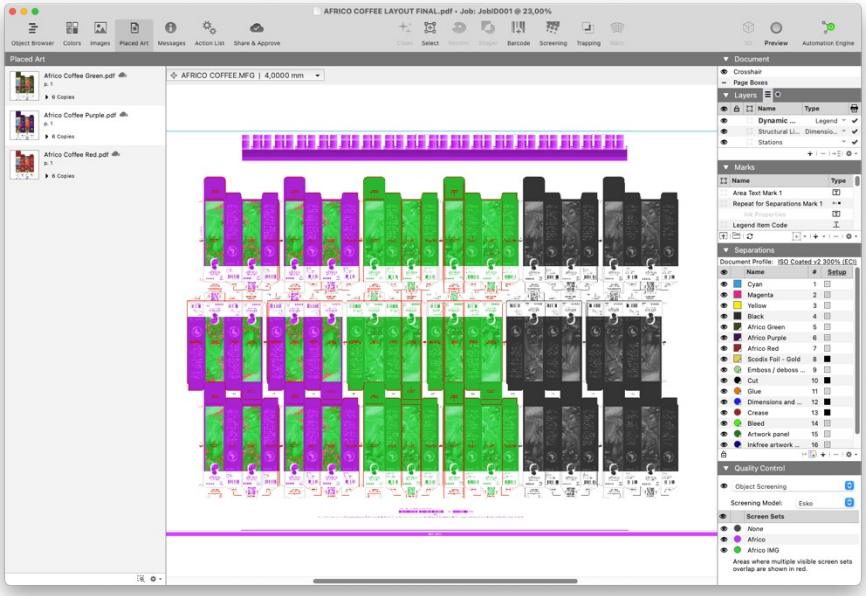
- The warp tool now recognizes sections in a complex die shape to optimize the pre-distortion

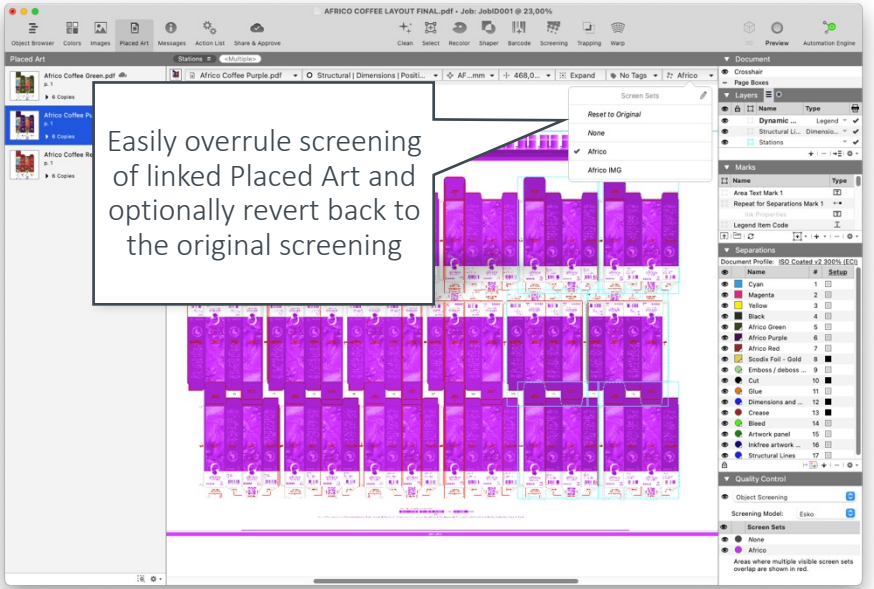
Overrule Screening of Linked Placed Art

Easily handling exceptions

Overrule Screening of Linked Placed Art

- Much easier: No need to open and update the external file to change the screening of a linked Placed Art object. You can now simply apply a screen set to the Placed Art object itself.





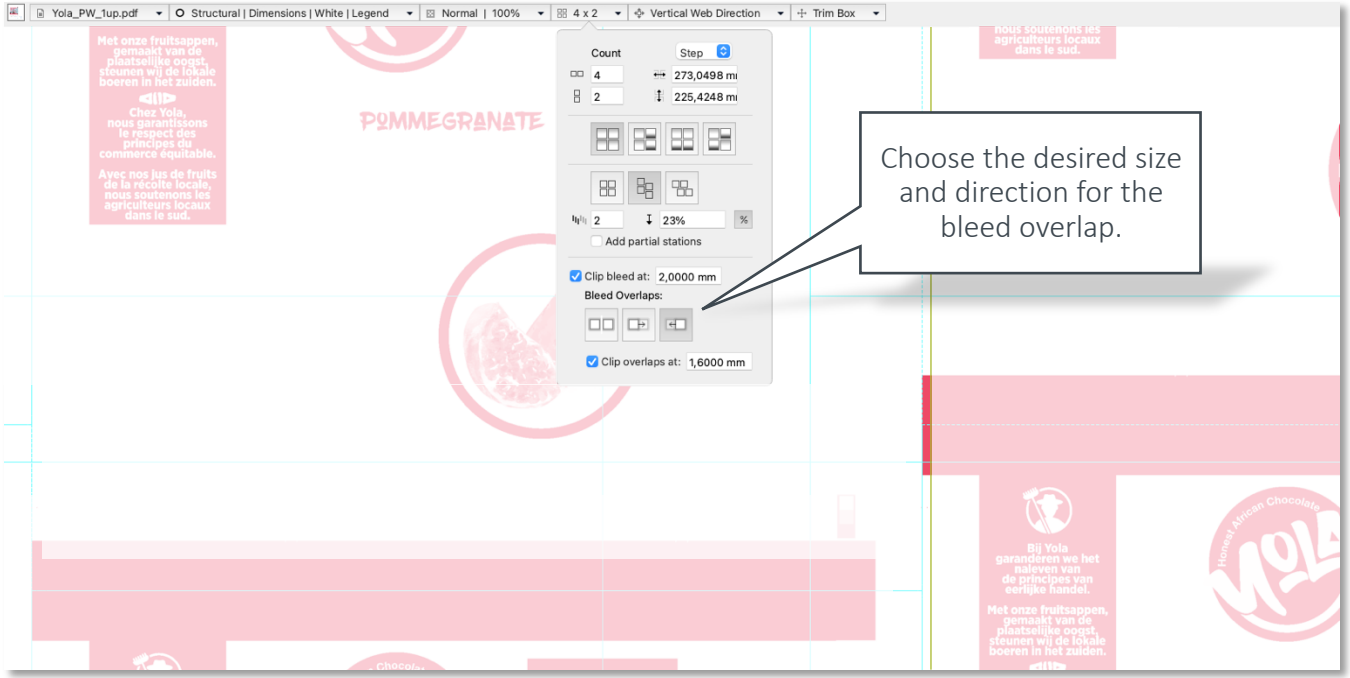
Bleed Clipping for Flexible Packaging

More power for the grid

ESKO

Bleed Clipping for Flexible Packaging

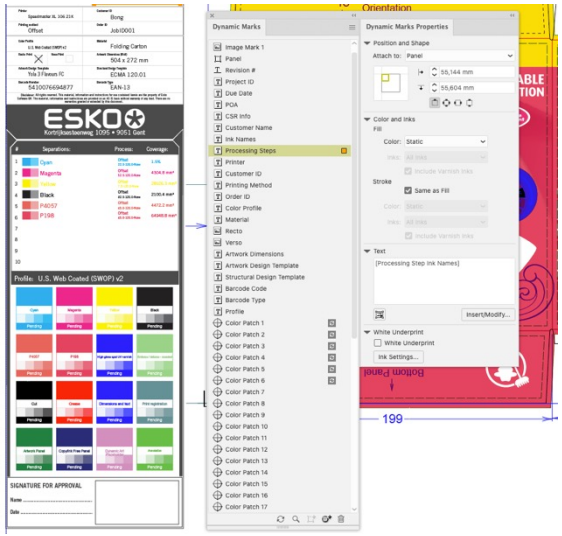
- The typical “roll over” of bleeds for flexible packaging layouts can now be configured in the grid.



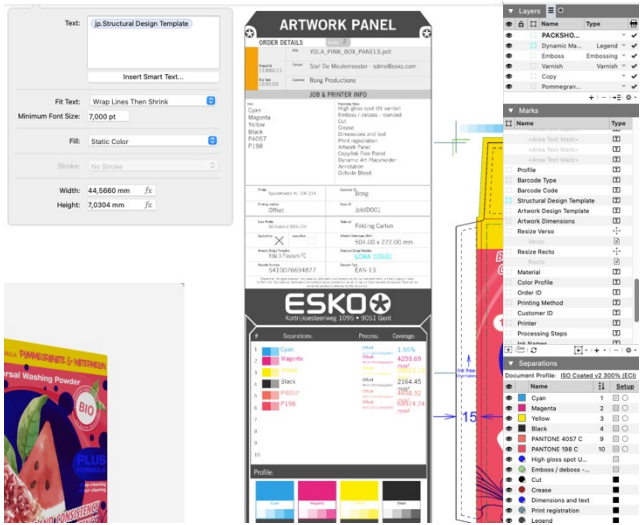
Use Mark Sets from DeskPack

Use Mark Sets from DeskPack

- You can now export Mark Sets from DeskPack to PDF+ and use them in ArtPro+ and Automation Engine



Dynamic Marks in DeskPack



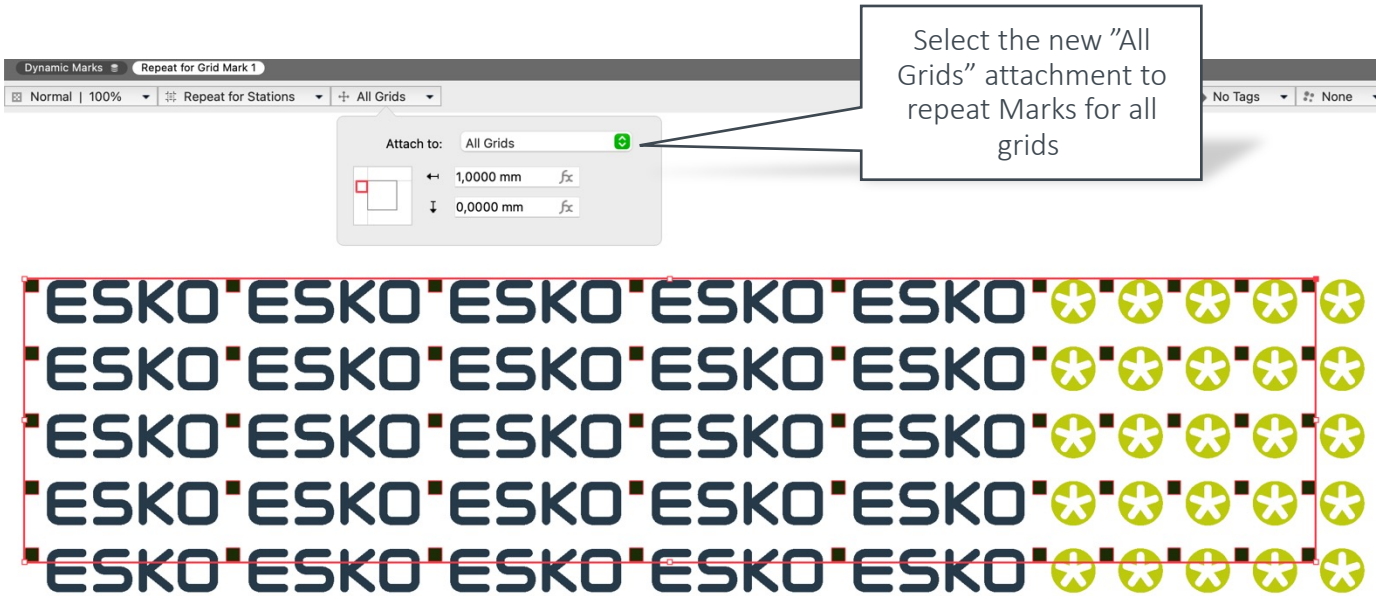
Dynamic Marks in ArtPro+

Grid Mark Support for Multiple Grids

Efficient

Grid Mark Support for Multiple Grids

- You can now set up one Grid Mark for all grids in a layout

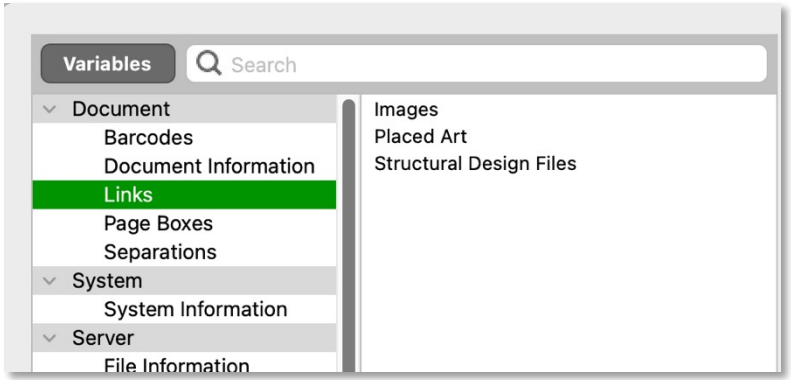


Marks Improvements

Marks Improvements (1)

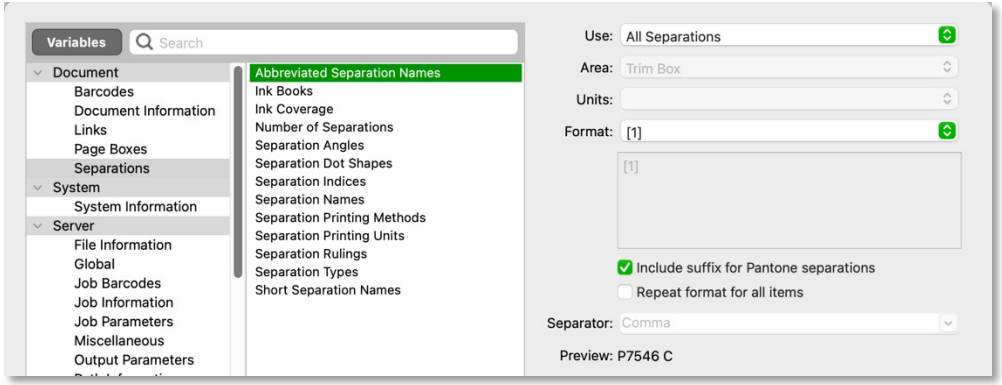
- To make Text Marks even more flexible several improvements have been made:
  - Text in Path support
  - Right to left text support (Rectangular text box only)
  - Paragraph justified - center - right are available
  - Keep Text Tracking when updating Marks

- You can now list linked images and Placed Art with two new variables in category “Links”



Marks Improvements (2)

- Turn any available barcode type in ArtPro+ into a Barcode Mark
- You can set up Text Mark variables for separation names to include the Pantone suffixes



- Apply more flexible conditions with the new custom rule „Doesn’t contain“

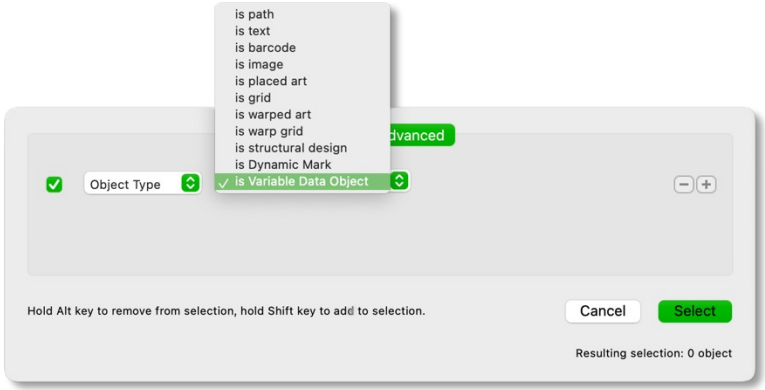
More Automation with PDF Action Lists

PDF Action List Improvements

- New PAL actions
  - Replace Linked Placed Art

  - Specifically delete sublayers

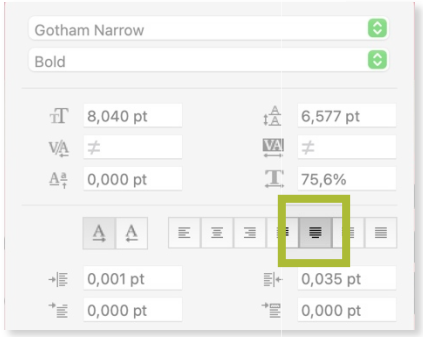
- New Select By Attribute
  - Select Variable Data objects

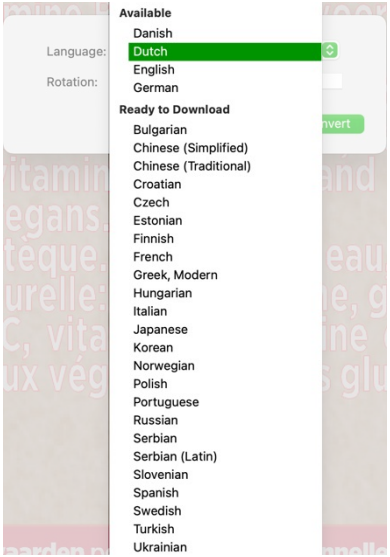


More Text Features

More Text Features

- You can now use special fonts such as Dingbats or Symbol
- The last line in Paragraph can now become centred





- Text Recognition (Convert Outlines to Text) supports Eastern European languages support:
  - Bulgarian
  - Croatian
  - Estonian
  - Serbian
  - Slovenian
  - Ukrainian

New Barcodes

New Barcodes

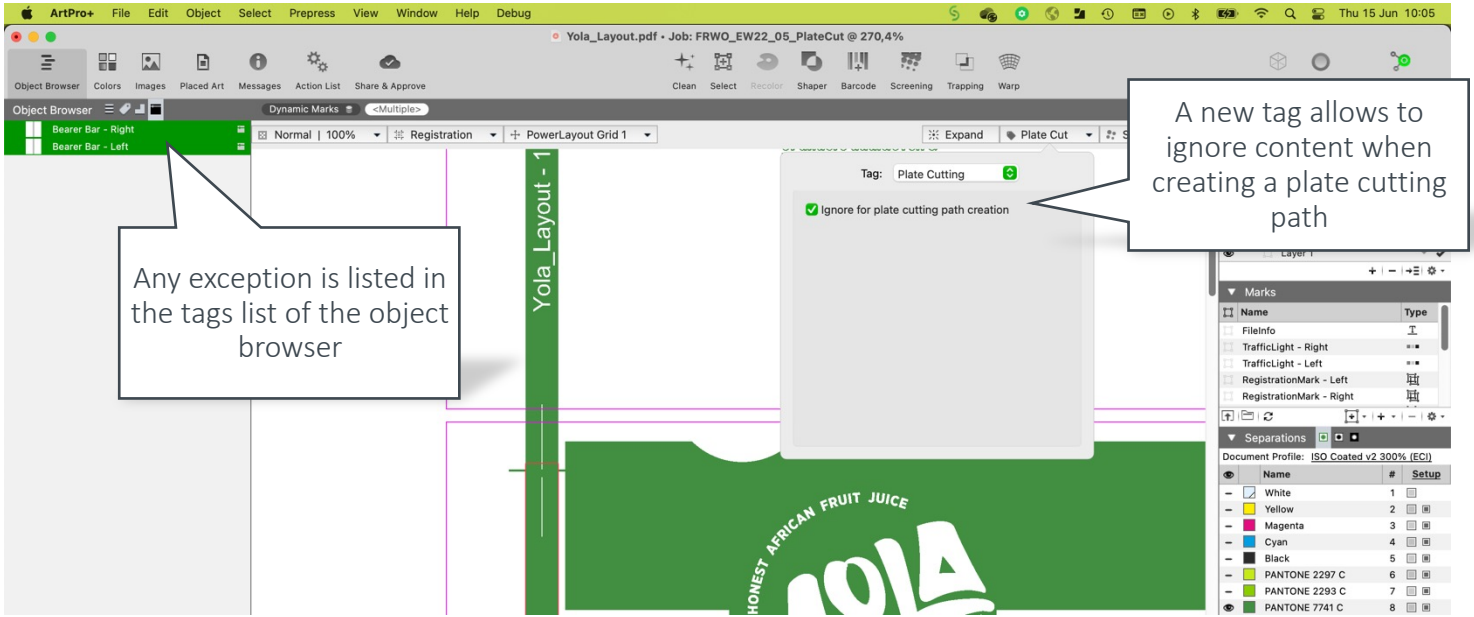
- New barcodes:
  - GS1 QR
  - GS1 DataBar Limited
  - UPC SCS
  - NDC / HRI

Exclude Objects When Plate Cutting

More control

Tagging to Ignore Objects when Plate Cutting

- With the new tag you can tune Plate Cutting to your specific needs so a Plate Cutting path does not have to take into account the tagged objects.

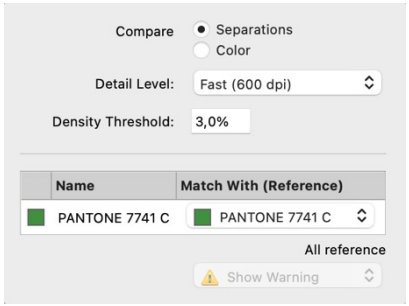


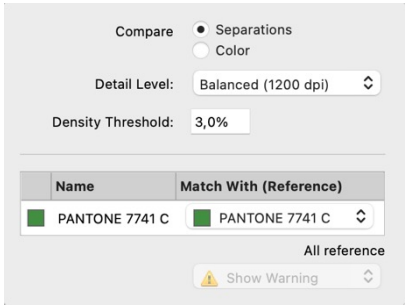
Resolution and Threshold Options when Comparing

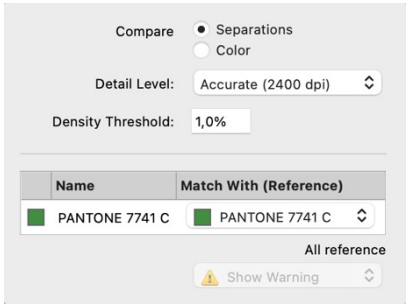
Don’t miss a thing

Resolution & Threshold Options in Compare Tool

- To adjust the Compare sensitivity to your needs, you can choose from three Detail Levels and define a density threshold







Share & Approve

Share and collaborate PDF from within ArtPro+

Dimmed Outlines in Outline Mode

Focus on the job at hand

Dimmed Outlines

- To provide you with a less cluttered view, outlines are now rendered in a light blue

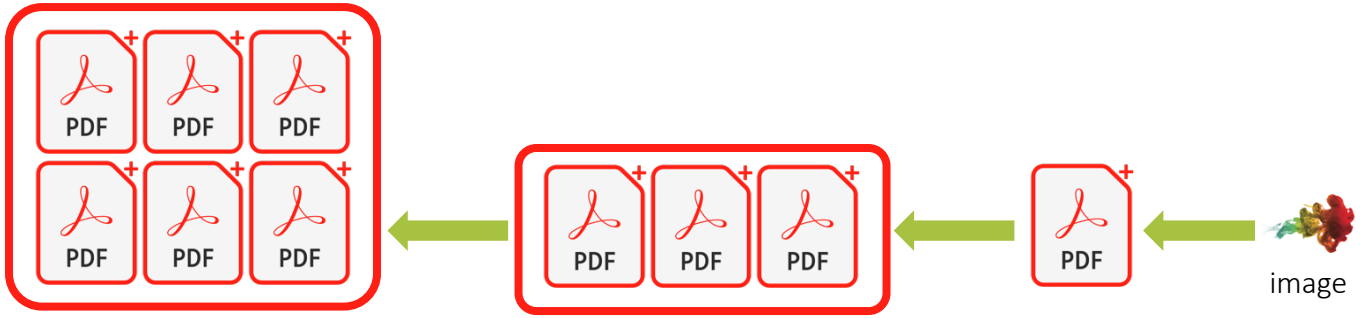
Update Nested Links in PDF+

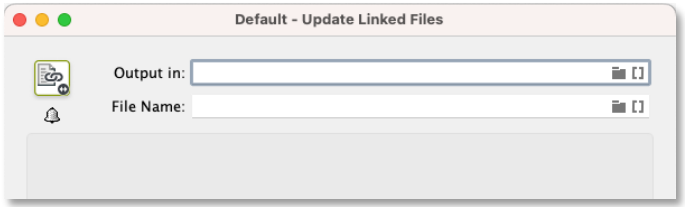
Never miss a change

ESKO

Update Nested Links in PDF+



- Native PDF files are always self-contained. For updating changes in nested external references, the intermediate file(s) need to be updated. The new ticket is automating this effort.



Confidential - Company Proprietary
