

Color Pilot 21.03

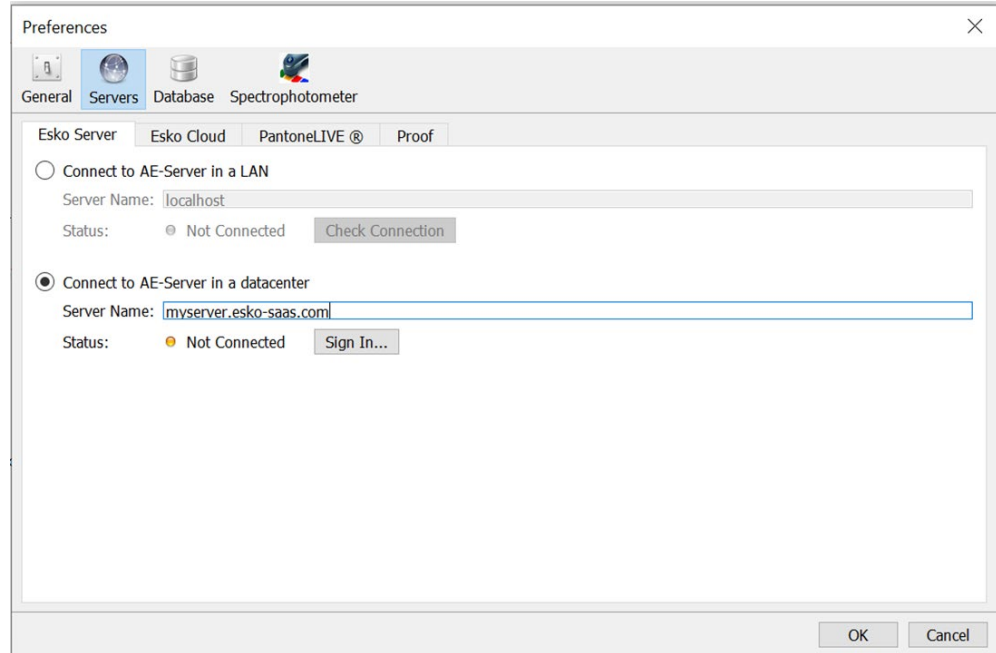

What is New

David Harris

March 2021

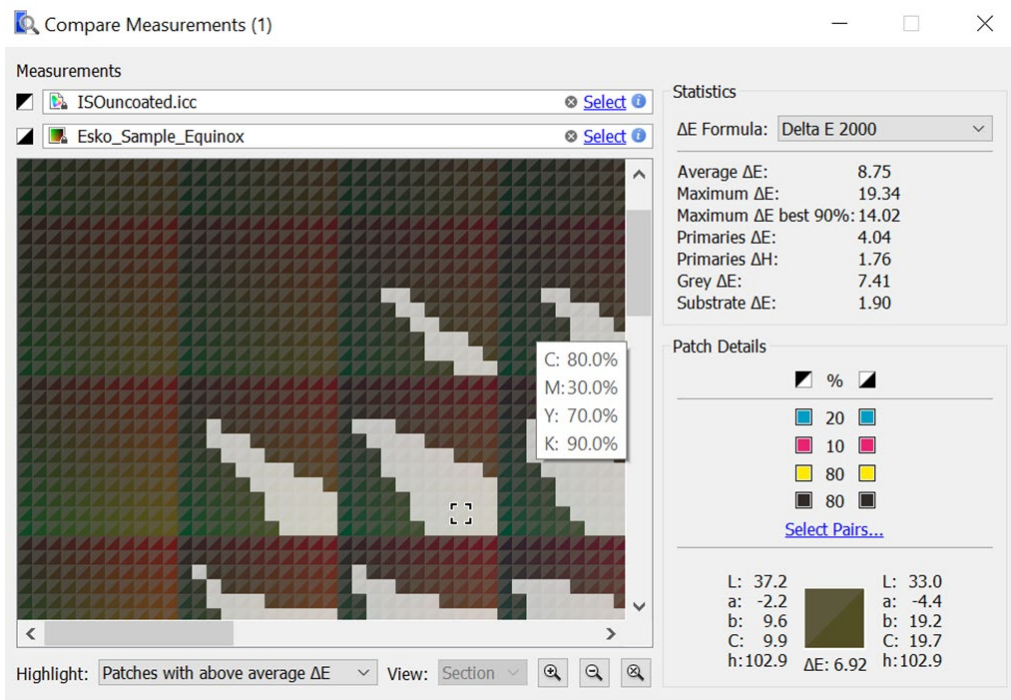

Connect to Automation Engine in a datacenter

- Option to **connect to a datacenter**
- Secured via a username/password:
 - Purchase of Automation Engine datacenter products is required
- Color data is automatically synchronized with the datacenter
- Editing of data by authorized users is possible:
 - Only one user may edit at a time (to prevent data conflicts)
 - Authorization can be managed via the Automation Engine

For more information, please read the
Automation Engine documentation

Compare measurements of a profile

- Can compare the measurement data of any two profiles
- Visual and broad range of statistics can be viewed
- Feature included as standard for all licensed Color Pilot users
- Many use cases such as:
 - comparing press profile to a standard
 - check profile of specific press against the site average
 - check for variation of profile over time

Color Pilot - feature comparison chart

	2021	2020		2019	2018	2017	
	21.03	20.1	20.0	18.1	18.0	16.1.1	
Compare profile data	✓	✗	✗	✗	✗	✗	Useful tool for managing your profiles
Connect to Automation Engine in a datacenter	✓	✗	✗	✗	✗	✗	Centralize color and workflow for enterprises
64 bit application	✓	✓	✗	✗	✗	✗	Modern and more reliable software architecture
