

DeskPack 25.03

What's New

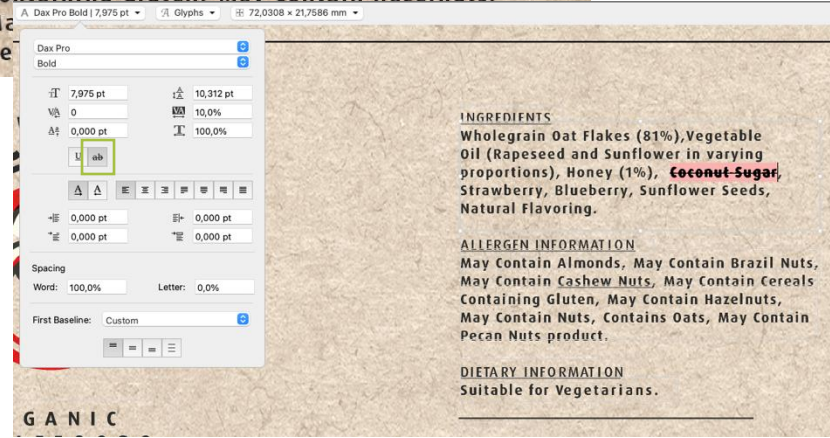

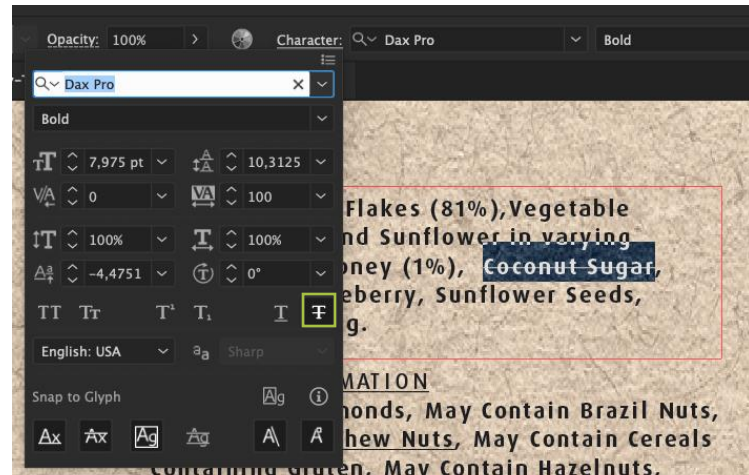

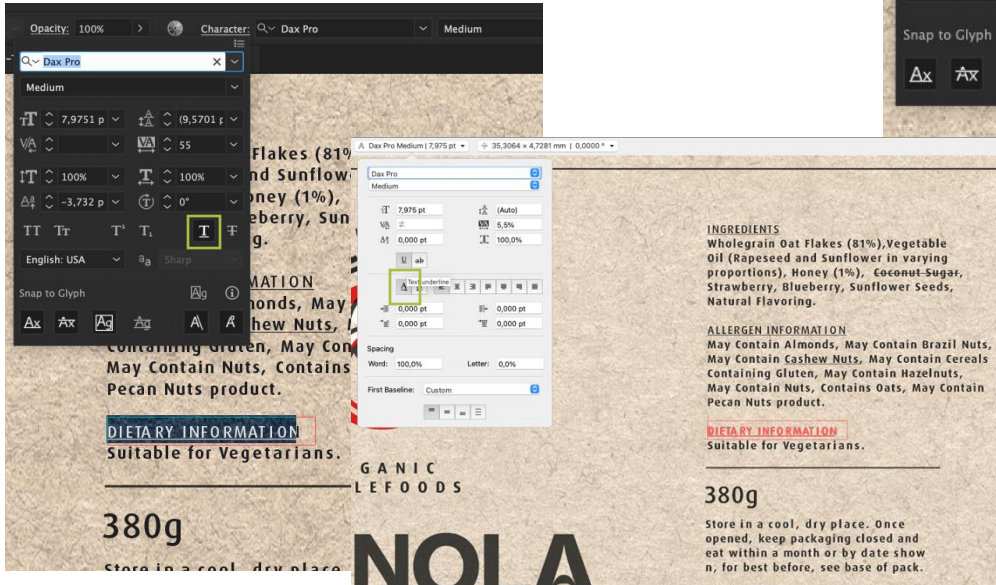

Balaji Rengarajan

Product Manager, Graphic Editing

Text Engine Improvements

- Underline Text
- Strike-through Text

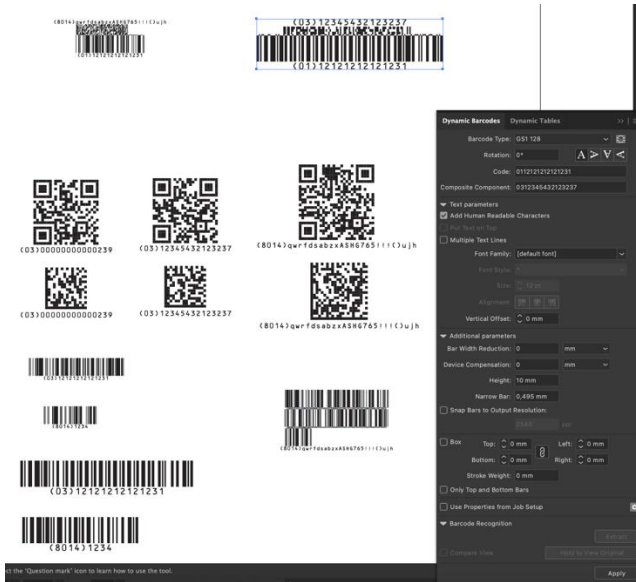

EUDAMED GS1 Barcode Compliance

- DeskPack now supports GS1 Application Identifiers (03 & 8014)

AI	Data Content	Format	FNC1 Required
03	Identification of a Made-to-Order (MTO) trade item (GTIN)	<u>N2+N14</u>	
8014	Highly Individualised Device Registration Identifier (HIDRI)	<u>N4+X..25</u>	YES

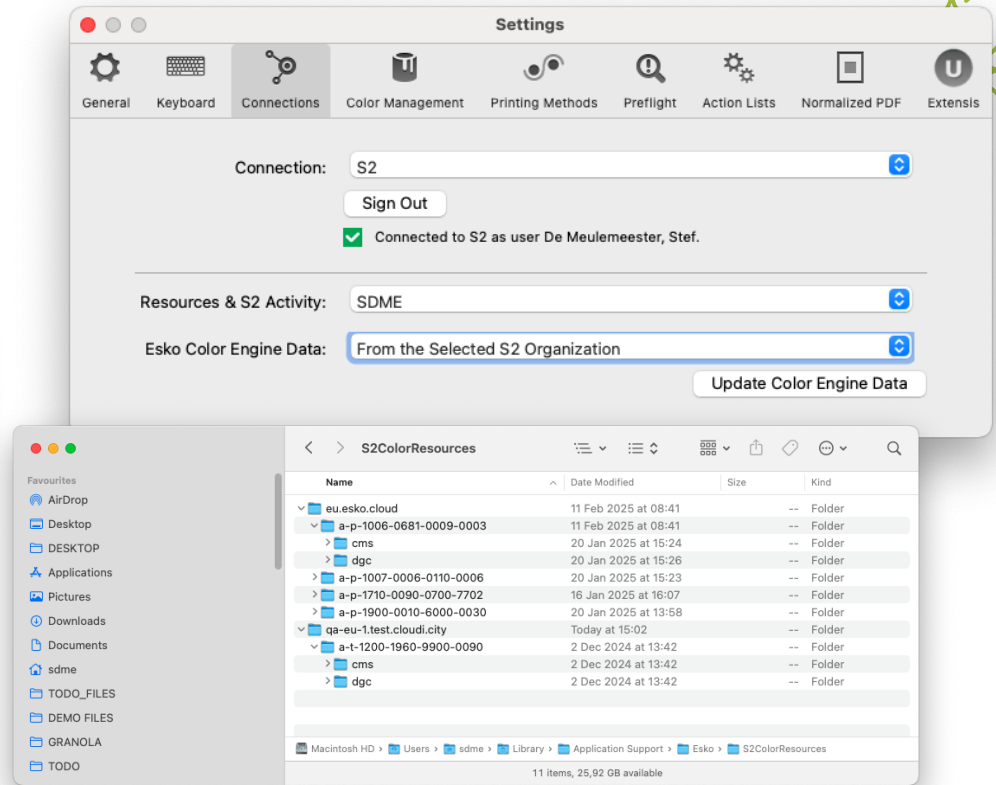

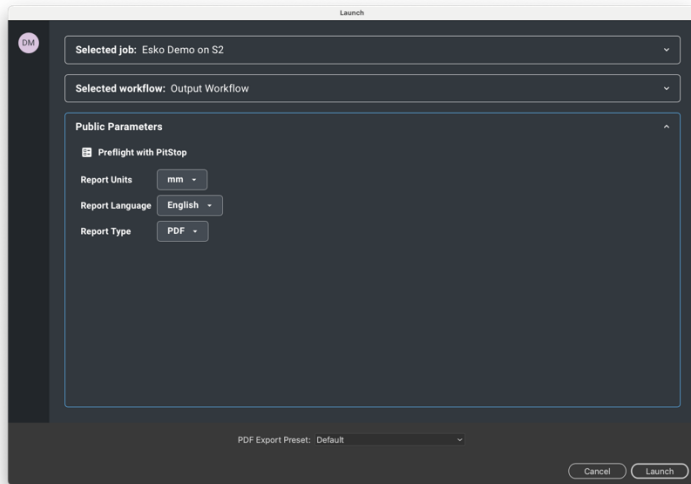

Ensure regulatory **compliance** and seamless traceability with GS1 barcode support for **EUDAMED** (European medical device standards)

S2 Improvements

- Sync Screen Presets
- Color Resources folder per Esko Cloud Account
- S2 Launch Workflow

The **Unified Platform approach** for centralization and automation, delivering a seamless prepress experience.

DeskPack Connected S2

Real-Time Collaboration

Check-In / Check Out System in DeskPack prevents any overwrite and data loss

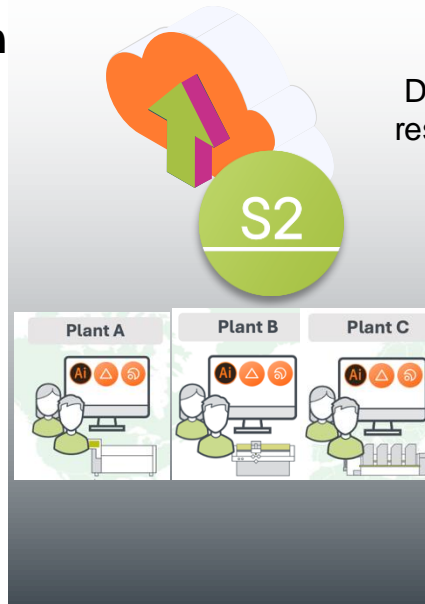

Version History

Track all version changes and compare differences in S2 Viewer in a browser

Smart Asset Search

Advanced metadata-driven search for assets and resources in S2 directly within DeskPack

Confidential - Company Proprietary

Secure Access Control

Define permissions for editing critical resources (AE Workflows, Marks) Vs. Only Viewing or using them

Centralized Resource

Maintain a single source of truth for critical resources (Color, Preflight Rules, Workflows etc...)

Seamless Workflow Integration

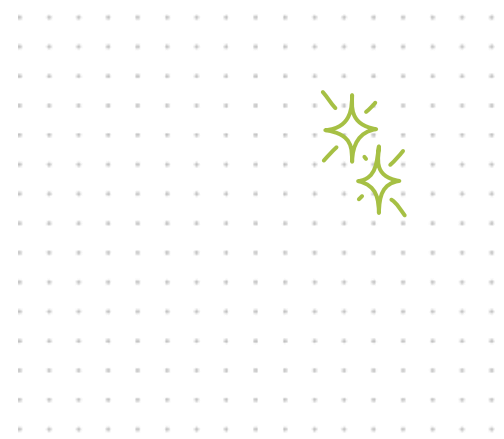

Direct integration with AE S2, other S2 applications and S2 Drive

Miscellaneous

- Subscription Bundles updated for 25.03: Tiff Export added to both Essentials and Advanced , Seamless Repeat now in Advanced bundles
(Planned for 25.07: also add Text Recognition, Packaging Preflight to Essentials, and Flexo and Ink Tools to Advanced)
- Dynamic Barcode Improvements (LMI keeps position of bars, new GS1 AI 03 & 8014, missing custom font outlined)
