

Imaging Engine & Print Control Wizard What's new in 23.11

12 October 2023

Robert Bruce

Product Manager Flexo Software

Imaging Engine 23.11 – What's new

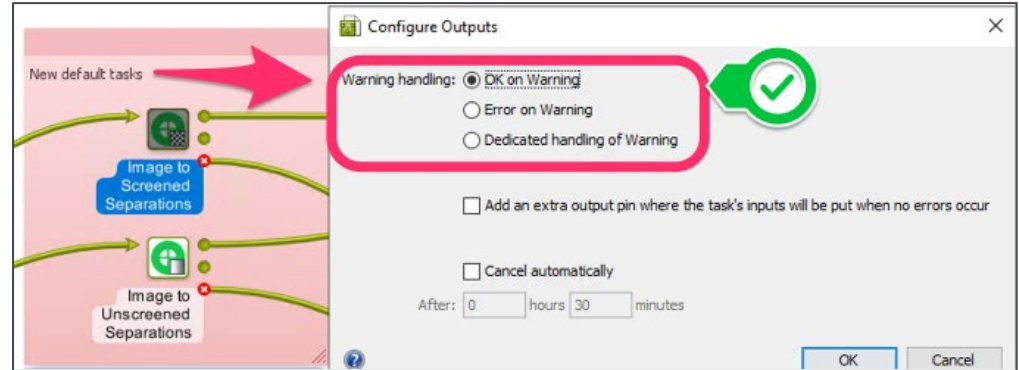

- New APPE version 6.2
 - including bugfixes only
- Support for Identical repeated 1-ups in 3rd party PDF files
- Screened and Unscreened Tickets; extension of 'Configure Outputs'
 - Extra warning handling available + extra output pin for the task's inputs

Imaging Engine 23.11 – What's new

- Support for Identical repeated 1-ups in 3rd party PDF files
- Imaging Engine recognises repeated 1-ups in PDFs made by 3rd party software, to match behaviour in ArtPro+
 - Repeated 1-ups are recognised for identical rendering even if they do not have nPDF or PDF+ metadata
 - This way it's consistent with PDF files made by AP+

Imaging Engine 23.11 – What's new

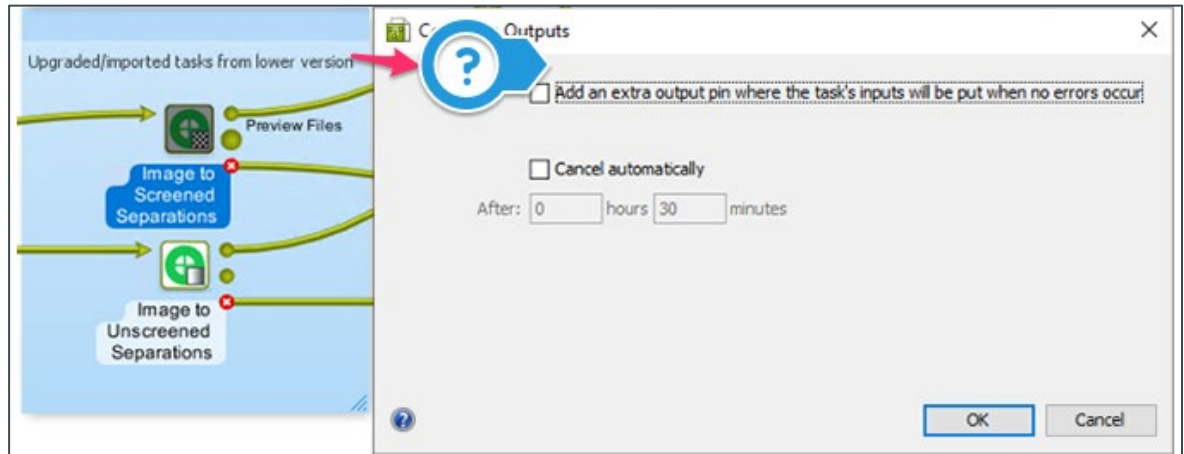

- Screened and Unscreened Tickets: in 'Configure Outputs' you can now define dedicated handling of warnings
 - Ok on Warning
 - Error on Warning
 - Dedicated handling of Warning

- Limitation: for existing workflows, you need to open and close (with the "OK" button) the Imaging Engine ticket to have the warning handling available.

Imaging Engine 23.11 – What's new

- Screened and Unscreened Tickets : in 'Configure Outputs' you can now define
 - Extra output pin to put the task's inputs

Print Control Wizard 23.11 – What's new

- Support for the X-rite eXact 2 device
 - Currently Spot measurement only
 - Scan mode is not supported yet; it might work but not guaranteed as it depends on the type of chart measured (planned for next release)
 - All models supported
 - eXact 2 / eXact 2 XP / eXact Plus
