

MediaBeacon 22.07: What's New

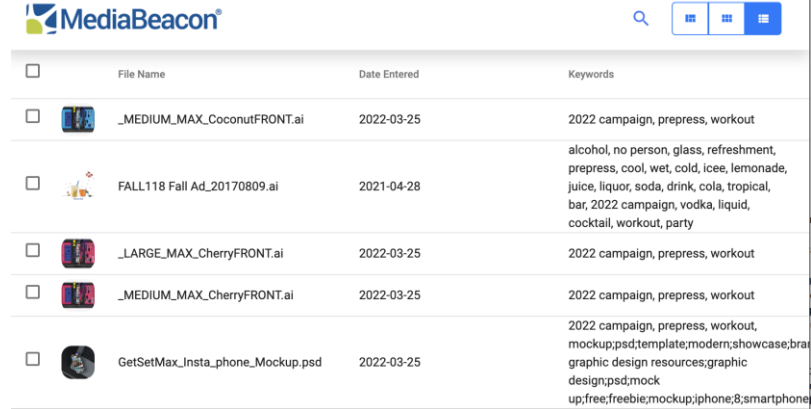

Selection UX Improvements

- **Selection Menu Improvements:** Provided more consistency to the context of the menus.
- **Shopping Cart Update:** Incorporated feedback from users and UX testing to provide more efficient behavior with docked carts
- **Subscription for selections:** provided clarity of selection state within subscription menu for selections

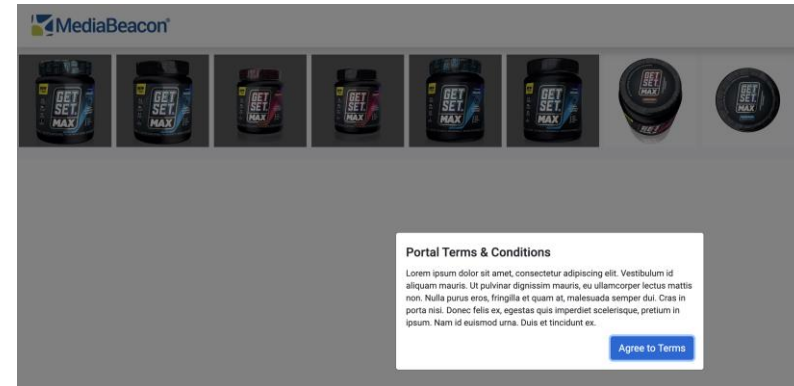

External Portal Enhancements

- **Asset List View:** Provide a list view within the External portal with admin configured fields
- **Search Criteria Portals:** Portals can now be created based on search criteria and update as content matches that criteria
- **Terms and Conditions:** Administrators may now show specific terms and conditions prior to accessing the portal.
- **Passphrase:** Added the ability to require a passphrase before initial portal access
