

# What's new in Imaging Engine 18.1

5th April 2018

## What's new in Imaging Engine version 18.1

- This document lists all changes and improvements since the Esko Software Platform November 2019 Release
  - Updated Adobe Kernel Version (APPE 5.1)
  - Print Control Wizard-related parameters
  - About LENX
  - Metallic ink support Epson SC-S80600
  - Solved Customer Issues: Highlights
- System requirements and fixes can be found under the Release Notes section on the Imaging Engine 18.1 DVD

## Updated Adobe Kernel Version (APPE 4.9)

- The Adobe PDF Print Engine (APPE) version inside 18.1 is 5.1
- The difference with APPE 4.9 (which was included in 18.0.1) is extra bug fixes only

What's new in Imaging Engine 18.1

- **Updated Adobe Kernel Version (APPE 5.1)**
- Print Control Wizard-related Parameters
- About LENX
- Metallic Ink Support Epson SC-S80600
- Solved Customer Issues: Highlights

## Print Control Wizard-related Parameters

- The Print Control Wizard is an application that generates a ready-to-use Crystal Screen and a Curve Set for a specific Printing Condition
- For Print Control Wizard users extra options become visible in the *Image to Screened Separations* task

### What's new in Imaging Engine 18.1

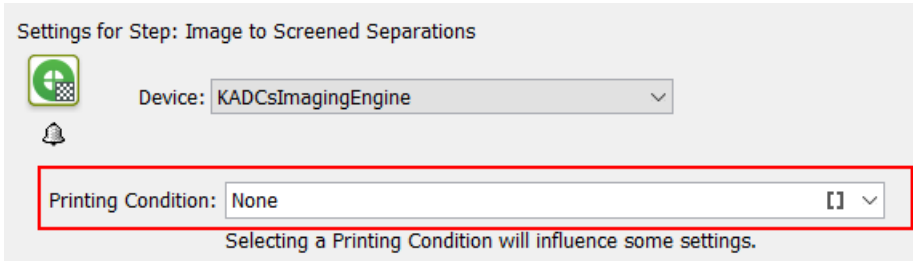

- Updated Adobe Kernel Version (APPE 5.1)
- **Print Control Wizard-related Parameters**
- About LENX
- Metallic Ink Support Epson SC-S80600
- Solved Customer Issues: Highlights

# Printing Condition Parameter

- The Printing Condition control presets other options like the right Dot, Ruling and Press Curve per ink, the File Type, the Resolution,...

What's new in Imaging Engine 18.1

- Updated Adobe Kernel Version (APPE 5.1)
- **Print Control Wizard-related Parameters**
- About LENX
- Metallic Ink Support Epson SC-S80600
- Solved Customer Issues: Highlights

## LEN/LENX File Type

- Print Control Wizard users have LEN/LENX as a File Type instead of LEN

File Type:	LEN/LENX File	⌵
File Assembly:	1 File Per Separation	⌵
Output Type:	Separate	⌵
Compression:	Flate	⌵

- Imaging Engine will automatically generate LENX (V2) output when Crystal Screens are used otherwise LEN is generated

### What's new in Imaging Engine 18.1

- Updated Adobe Kernel Version (APPE 5.1)
- **Print Control Wizard-related Parameters**
- About LENX
- Metallic Ink Support Epson SC-S80600
- Solved Customer Issues: Highlights

# About LENX

- LENX (V2) was built for CDI
- The Crystal Screens it contains are made for a specific printing condition and a specific CDI and it needs to be exposed on *that* CDI to have optimal output quality
- LENX (V2) can only be imaged on CDIs installed with Grapholas 18.1 or higher
- LENX(V2) is NOT an exchange format
- Important note: the “Prepare for Viewer” task is not supported for LENX(V2). The in-Rip prepare for viewing functionality needs to be used instead (available since 18.0.1)
- More detailed information can be found here:
