# Ability to automatically start an Approval Cycle

## New preference setting

- Ability to start approval cycle on file upload

### Auto Start Approval Settings ⓘ

Do not start approval after upload ▾

**Do not start approval after upload**

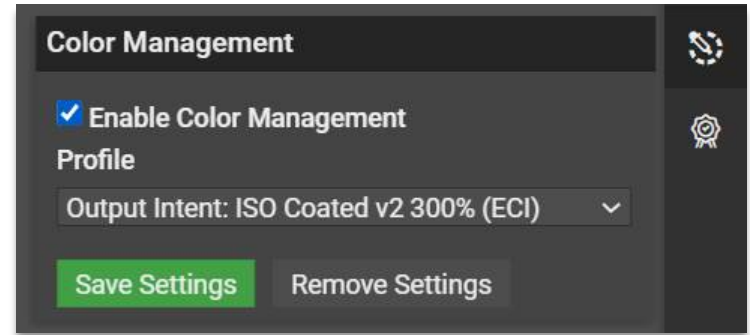

● Auto start approval after file upload

Ask to set approval cycle on file upload

# Viewer Improvements

## Color Managed Widget

- When enabling color management, it will default to the output intent of the PDF file (if there is any embedded).
- You can change the profile to something else and Save it, this way allowing approvers to immediately see it with the correct profile
- We will write a knowledge base article about how to work with color management (including how to upload new profiles).
- Currently not yet integrated with the color service, that is a next step. This will allow uploading profiles via color engine pilot.
- Screen profile is currently always assumed to be sRGB. Support for other profiles (e.g. wide gamut RGBs) will come later.

# Viewer Improvements

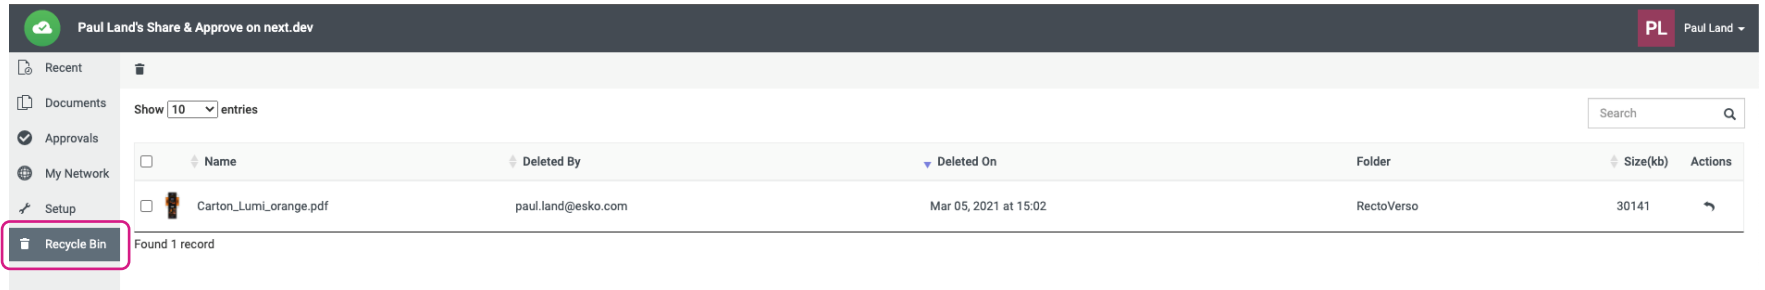

## Quality Control Widget

- Object screening: shows different screens in different random colors
- Total Area Coverage: shows an overlay where your area coverage is larger than the set %
- Breakout: shows areas below a breakout % (typical for flexography)
- Moiré detection: shows likelihood of moiré caused by infringing the angle and ruling rules or using different dot shapes (which possibly generate slightly different rulings).

# Recycle Bin

## Items available for 30 days

The screenshot shows a user interface for a file management system. At the top, there is a dark header bar with a green checkmark icon and the text "Paul Land's Share & Approve on next.dev". On the right side of the header, there is a red square with "PL" and the name "Paul Land" with a dropdown arrow.

Below the header, there is a sidebar on the left with several menu items: "Recent", "Documents", "Approvals", "My Network", "Setup", and "Recycle Bin". The "Recycle Bin" item is highlighted with a red rectangular box.

The main content area shows a table of deleted items. At the top of the table, it says "Show 10 entries" and there is a search box on the right. The table has the following columns: "Name", "Deleted By", "Deleted On", "Folder", "Size(kb)", and "Actions".

<input type="checkbox"/>	Name	Deleted By	Deleted On	Folder	Size(kb)	Actions
<input type="checkbox"/>	 Carton_Lumi_orange.pdf	paul.land@esko.com	Mar 05, 2021 at 15:02	RectoVerso	30141	

Below the table, it says "Found 1 record".

- Ability to retrieve files/folders before the 30 days
- Works with both files and folders
- Items in folders are also deleted/retrieved

# Other Improvements

## Navigation changes

The screenshot displays the ESKO Share & Approve web interface. At the top, a dark header bar contains the user's name 'Paul Land' and a profile icon. Below this is a navigation sidebar with options: Recent, Documents, Approvals, My Network, Setup, and Recycle Bin. The main content area is titled 'Paul Land's Share & Approve on next.dev'. A pink dashed box highlights the top navigation bar, which includes a 'Drop Files Here For Instant Upload' area, a 'Show 50 entries' dropdown, a 'Sort by Modification date' dropdown, and a search bar. Below this, the interface shows a grid of folders and documents. The folders section includes 'RectoVerso', 'VisualizerXMP', and 'Multilabel'. The documents section includes 'Carton\_Lumi\_orange.pdf', 'sample.pdf', and 'getting-started.pdf'. Each document card shows a thumbnail and a 'Setup Approval' button. The status of 'Carton\_Lumi\_orange.pdf' is 'Pending'. At the bottom left, it says 'Found 6 records'.

Top section remains visible as you scroll down the page

# Other Improvements

- Support for Japanese language
  - Change language via My Preferences/User Language.
- Delete most recent version
  - It is now possible to delete the most recent version of a document **if no approval cycle** was started yet.
