ESKO✤

# General Enhancements and Fixes

- **Improved User Experience**
    - Assemblies and planograms now appear on the library thumbnail view pane too
    - Model shadow and LOD settings were moved to a dedicated model settings dialog
    - Measurement tools can now be added to the quickbar
    - VR mirroring on the main screen will now apply color correction to match the visuals seen in VR

ESKO✱

# General Enhancements and Fixes

- **Enhanced Realism**
  - Added support for double sided dynamic raytraced reflections
  - Product reflections are now automatically updated after changing layer visibility

- **Physics Engine**
  - Physics motor joints are now started automatically when physics is run
  - Physics now behave correctly when switching variations while a physics simulation is running

ESKO✳

# General Enhancements and Fixes

- **Consumer Insights**
  - Consumer insights statistics will now reflect changes to category management in realtime
  - Fixed camera collision problem when replaying with the Consumer Insights viewer
