

What's new in Studio 16.1.2?

November 2017 Release

Susie Stitzel

Product Manager – 3D Solutions

susie.stitzel@esko.com

Latest and greatest system support

macOS High Sierra

Adobe® Creative Cloud™

macOS	10.10 (Yosemite), 10.11 (El Capitan), 10.12 (Sierra), 10.13 (High Sierra)
Windows	Windows 7, Windows 8, Windows 8.1, Windows 10
Adobe® Illustrator®	CS6, CC 2015.3, CC 2017, CC 2018 (all 64-bit)

Enhancements for KeyShot export

- Now supporting KeyShot v7, released August 2, 2017

- Enter the export resolution for textures when exporting to KeyShot:

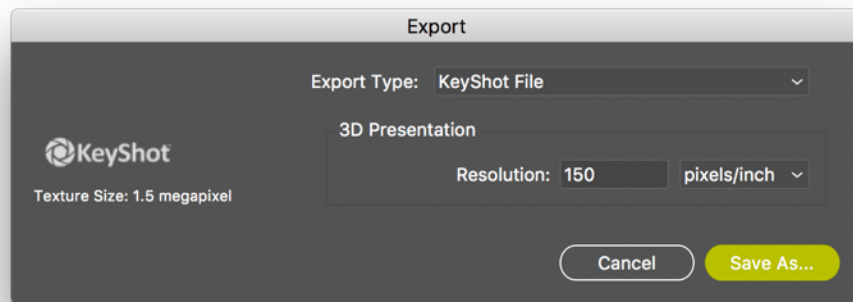

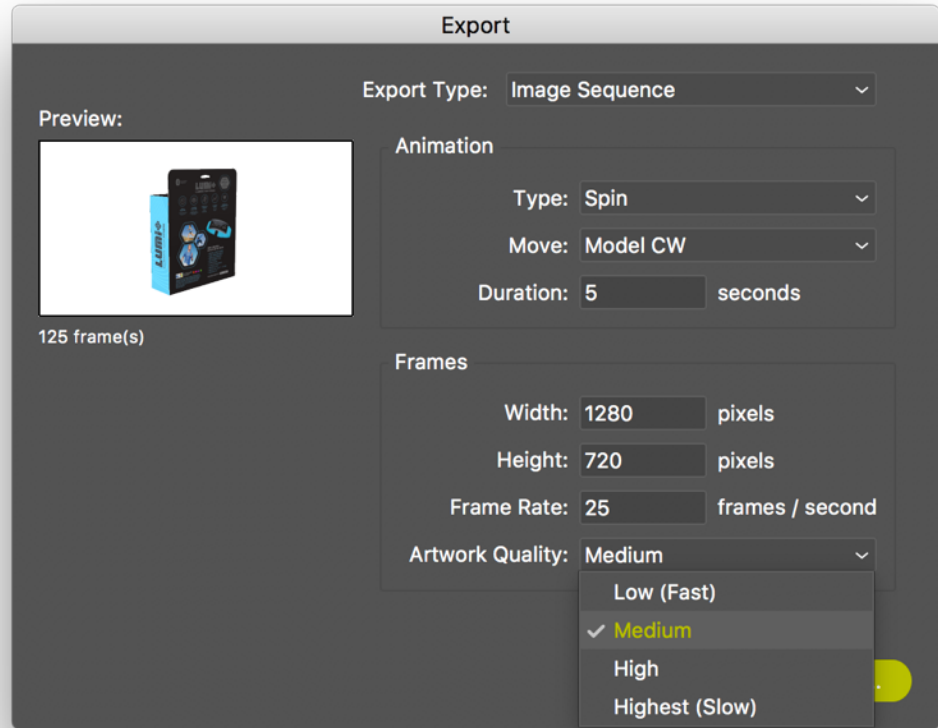

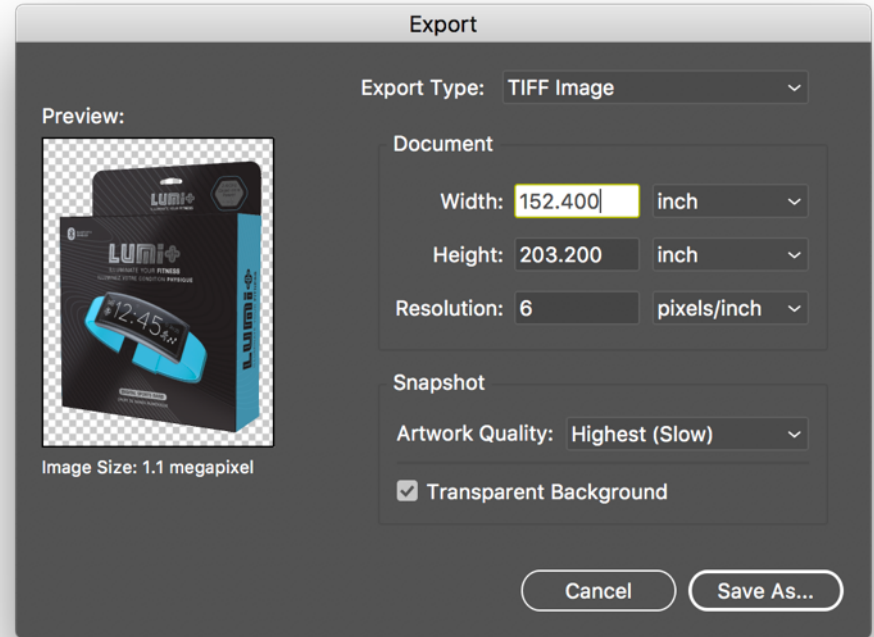

Image Sequence: user selectable quality setting

- Export > Image Sequence: offers Artwork Quality setting like Export > TIFF
 - Higher settings take longer to export but better quality; lower settings are quicker but lower quality
 - Choose the best setting for the resolution of the movie you intend to create

Change to color management for TIFF export

- Export > TIFF image: when working in Designer Quality **the Creative Cloud Working RGB profile is used** (Studio previously used the monitor profile of OS)
 - **Benefit:** consistent color output, regardless of which machine is used to export to TIFF
 - **Possible side effect:** there may be a difference between the colors in the Illustrator document and what you see in the Studio window
