### Cloud storage

Manage and share 3D files with your favourite cloud storage service and access directly in the Studio Viewer app.

## Named User Licensing

### What are named user licenses?

- License is linked to a user instead of a device
- Purchase and manage subscriptions centrally
- User management is done via online portal

### What is the difference with network licenses?

- Used by different users by closing the application
- Everyone that has access to the license server can take any license (no guaranteed access)

## Why named user licenses?

- Users will have their own single identity
- In the future access all Esko software on the desktop and in the Esko Cloud, data, ...
- Industry standard for SaaS
  - (Software as a Service)

## Named User Licensing

We looked at 14 leading SaaS companies, most of them offer named users...

## Named User Licensing

## The benefits

- Simplified license management
  - No more licenses!
    - No activation, product keys, HTML-files
  - Online user management
    - No need to access each individual computer
- More flexibility
  - User management can be centralized
    - No site restrictions
  - Licenses follow the user wherever they go!
