What's New in Store Visualizer 20.0.1?

Susie Stitzel

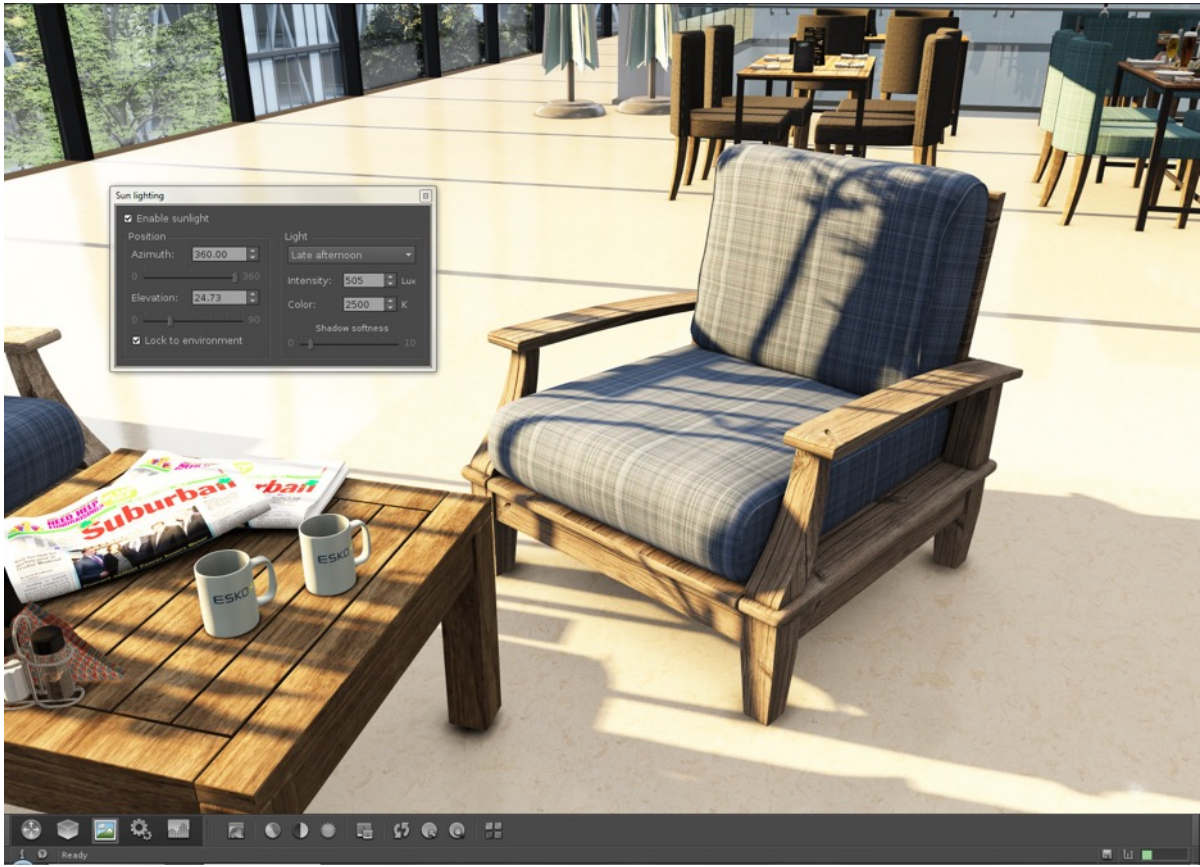
Director of Product Management – Design & 3D Solutions

November 23, 2020

Sun Lighting

- **Simulate exterior sunlight** through windows, doors and skylights

- Control Position and Color and the Sharpness of Shadows to simulate different times of day



Custom Colors for Dynamic Lights

- For realistic colored light sources: neon lights, LED strips, signage
  - Previously, you could only choose the color temperature

General Enhancements

- **Improved User Experience**
  - “Aligned” shelf placement and movement mode simplifies shelf placement against walls that are not orthogonal
  - Libraries are now sorted in alphabetical order in the Library panel, making them easier to locate when a large number of libraries are being used
  - Oculus Rift has the same positional correction as the HTC Vive
- **Compatibility**
  - Planogram import has been updated to support new JDA / Prospace file formats

Thank You!
