

WebCenter 18.1.1

Release Highlights

Product Management

October, 2019

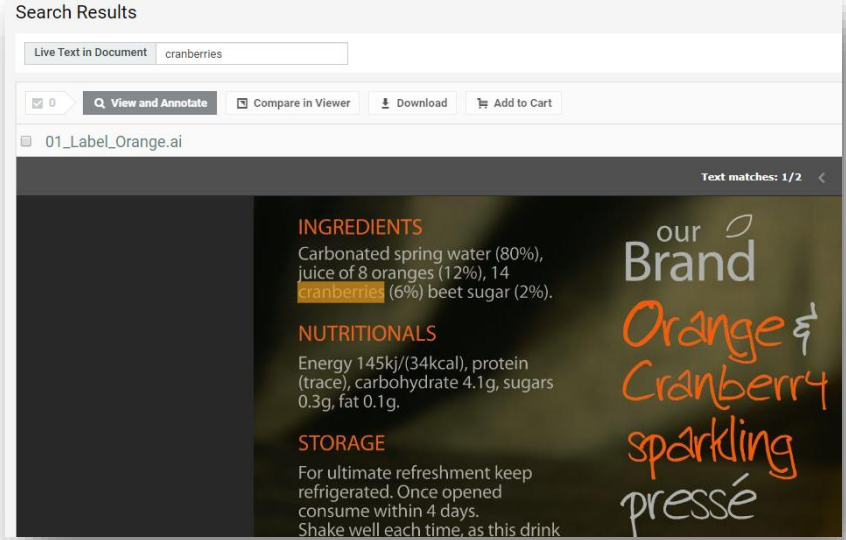

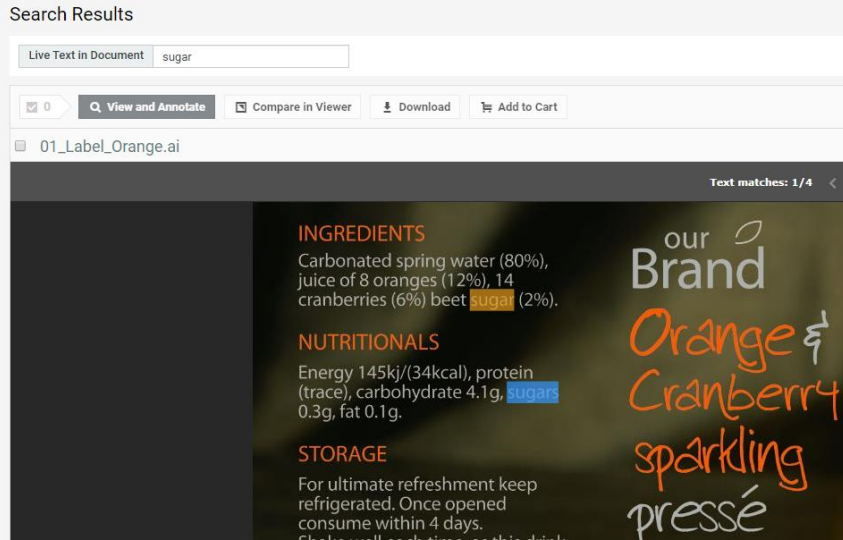

Summary

WebCenter 18.1.1 is a minor release of the WebCenter platform. It contains, however, several valuable functional improvements:

- **Live Text Search**
- **Search for all Referenced Versions of a Document**
- **Persistent Search Selection**
- **Focus Layout and Viewer Dashboard Block**
- **Improved Packaging Content Management Table functionality**

Live Text Search

Ability to create (saved) searches to locate PDF or Adobe Illustrator¹ documents with a given Live Text² string.

¹ The Live Text search feature is only available for non-encrypted PDF documents and Adobe Illustrator documents saved with a PDF-compatible part.

² The term "Live Text" is used for PDF text that is not "outlined" (i.e., converted to vector graphics).

Search for all Referenced Versions of a Document

A new search option, Version Used In, has been added to improve the efficiency of searching for a version of a document referenced from another document through a Document Reference.

The screenshot displays a search interface with the following elements:

- Search Bar:** Contains the text "Live Text in Document" and the search term "sugar".
- Navigation Buttons:** A row of buttons including "View and Annotate" (with a checkmark and the number 3), "Compare in Viewer", and a download icon.
- Document Preview:** Shows a document titled "02_Label_Pear.ai" with a light blue header. The main content area displays the document's text and a nutrition table.

Document Content:

INGREDIENTS
Carbonated spring water (80%), juice of 4 pears (12%), 8 blackcurrants (6%), beet (2%).

NUTRITIONALS
Energy 145kj(34kcal), protein (trace), carbohydrate 4.1g, 0.3g, fat 0.1g.

STORAGE
For ultimate refreshment keep refrigerated. Once opened consume within 4 days. Shake well each time, as this drink will settle upon standing.

DISPOSAL
Love the planet. This plastic bottle is widely recycled and its label is 100% recyclable. Please dispose of accordingly.

our Brand Pear & Blackcurrant sparkling pressé

A deliciously sweet & lightly sparkling pressé, made from Conference pears & freshly picked blackcurrants.

INGREDIE

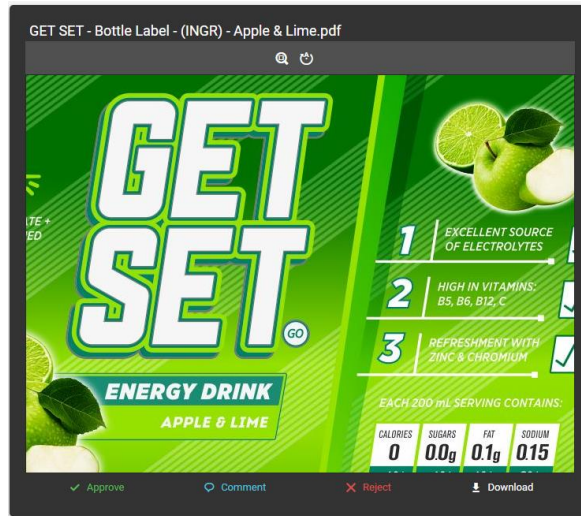

Persistent Search Selection

To improve the user experience when selecting a list of documents (e.g., include in a new project), the search result selection has been made "**persistent**" so that it survives reload of search results caused by paging, changing of criteria in the search panel or changes to search result layout options. Further, a convenient panel with the current selection ensures that the current selection is straightforward to inspect before starting an operation.

Focus Layout and Viewer Dashboard Block

The new search result focus layout option reserves a large portion of the screen for a single search result, making it possible for the user to inspect the individual search result items without opening document details or viewer window. When used together with persistent selection and the new Viewer dashboard block, the focus layout provides an efficient method for the user to click through a set of search results and determine which ones to include and which ones to omit for a specific operation.

Improved Packaging Content Management Table functionality

To improve efficiency when working with tables in the WebCenter's Packaging Content Management (PCM) module, a list of improvements have been added. It is now simpler to Add, Remove, Reorder, and Hide Columns and/or Rows to PCM tables and output PCM table previews to PDF format reports.

	A	B	
	NFT_TITLE	Amount Per Serving	
1	 Nutritional Information  	 Per Serving  	
2		Amount Per Serving (2)	Amount Per Serving (3)
		 100ml**  	 200ml**
3	Calories	Calories (2)	Calories (3)
	 Energy  	 47kcal  	 94kcal
	Total Carbohydrate Measure	Total Carbohydrate Measure (2)	Total Carbohydrate Measure (3)

Note: The availability of some of the mentioned functionality requires optional modules in WebCenter.
