

# Your Workflow, More Intuitive than Ever

What's New in WebCenter 21.03

April 6, 2021

# Expanded Dashboards

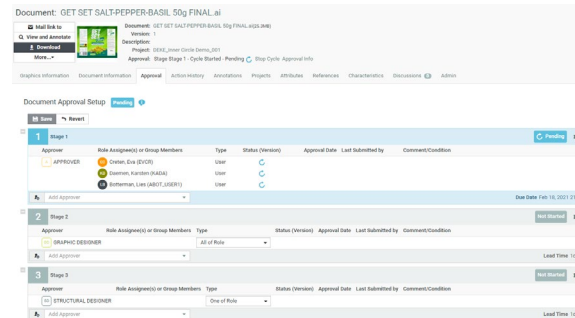

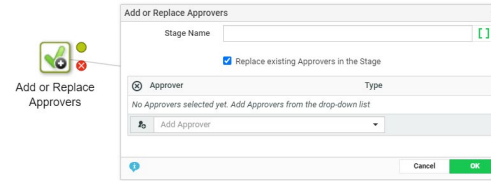

- Additional document sources available
- Document source inline action-buttons
- Set required fields in dashboard forms
- Version-up in upload landing

Extending dashboard capability to create a more intuitive user experience

# Flexible Approvals

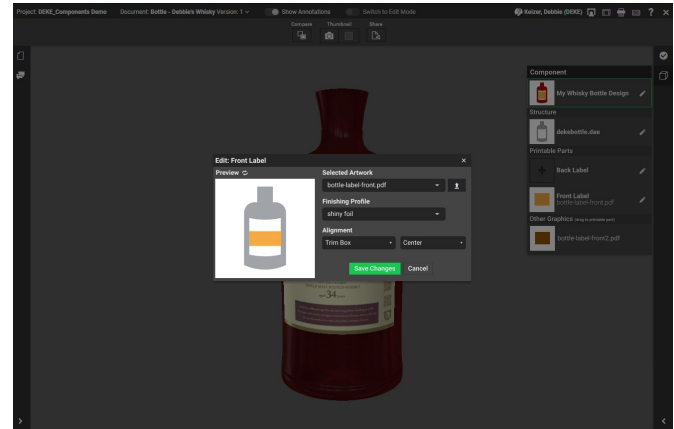

- Workflow Node: Add and Replace Approvers
- Change approvers without stopping approval cycles
- Reason(s) for Forced Rejection
- Route on Reason for Rejection from any approval stage

Adding more flexibility to the approval process

# 3D Assembly Improvements

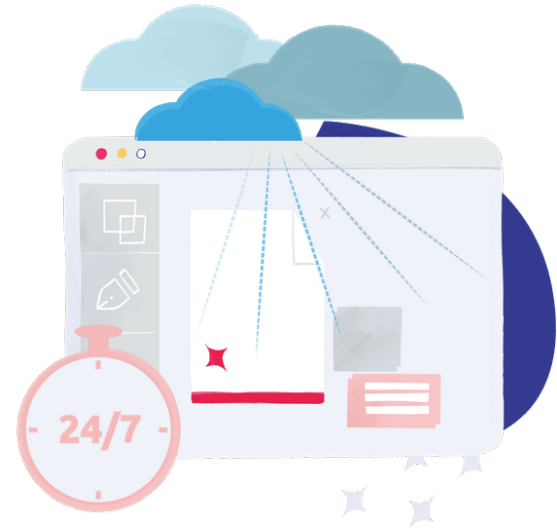

- Create assemblies directly from CAD and Collada files
- Improvements to the View component widget

Simplified 3D object creation

# CHILI Improvements

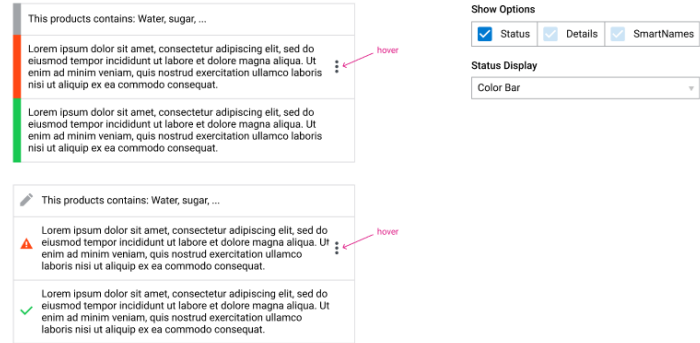

- **Multiple Chili Server Support**  
Connect more than one CHILI server to WebCenter
- **CHILI Document Version Support**  
Configure which CHILI server to use for which document

Connect to CHILI publisher Online

# Package Content Management Improvements

- **Performance Improvements**  
Text Content Sheets load twice as fast
- **Smart Text Inheritance**  
Existing translations are auto filled when using Smart Text
- **Drop-down Support**  
Predefine the possible values for text
- **Improved Text Input Field**  
Optimized and simplified the text input field

Strong focus on improving the UX, Performance and InDesign support
