# What's New in
# WebCenter 23.07

ESKO

# User Interface & Experience

*Complete work faster with a powerful and intuitive user interface.*

- **(23.07) Copy With References**
  - *Empower users with seamless document replication in the UI/Dashboard framework. "Copy With References" allows you to effortlessly create exact duplicates of your documents, including all associated references, properties, and attributes.*

*Copy With References*

- (23.03) Global Styling for Buttons
- (23.03) Global Styling for Menu Layout in the Page Builder
- (23.03) New Progress Bar Visible When Saving Forms
- (23.03) The WebCenter Favicon is configurable via the UI.
- (22.11) Update to Latest Version
- (22.11) Duplicate

- (22.07) Script Button Actions (Dashboards)
- (22.07) PCM in Dashboards
- (22.07) Reorder Document Rows in List View
- (22.07) Edit document reference properties
- (22.03) Script Button Actions (Documents)
- (22.03) Visibility Rule Enhancements
- (22.03) Document Reference Rendering

# WebCenter Cloud

*Leverage modern cloud architecture to maximize performance and security.*

- **(23.07) Asset File Type Conversion Node (Enhancement)***
  - *Seamlessly convert a range of file types to PDF, enabling greater compatibility, standardization, and ease of use. Whether you're working with files in formats such as ps, eps, ai, psd, tif, tiff, jpg, jpeg, pdfpla, png, bmp, tag, doc, docx, xls, xlsx, ppt, or pptx, WebCenter has got you covered.*

- **(23.07) Native Video Support***
  - *Seamlessly expand the power of WebCenter's approval capabilities to your video assets, revolutionizing your workflow like never before. Effortlessly view and approve video assets directly within the WebCenter Viewer.*
  - *By Request only for version 23.07*

- **(23.07) Time Based Annotations**
  - *Take annotations beyond graphic files and dive into the realm of video, adding a whole new level of precision and context to your creative process.*
  - *With Time-Based Annotations, you can simply drag the sliders on the video timeline to define the exact start and end points for your annotations. This granular control allows you to capture the essence of your feedback precisely, making your communication crystal clear and reducing any potential confusion.*

*Time Based Annotations*
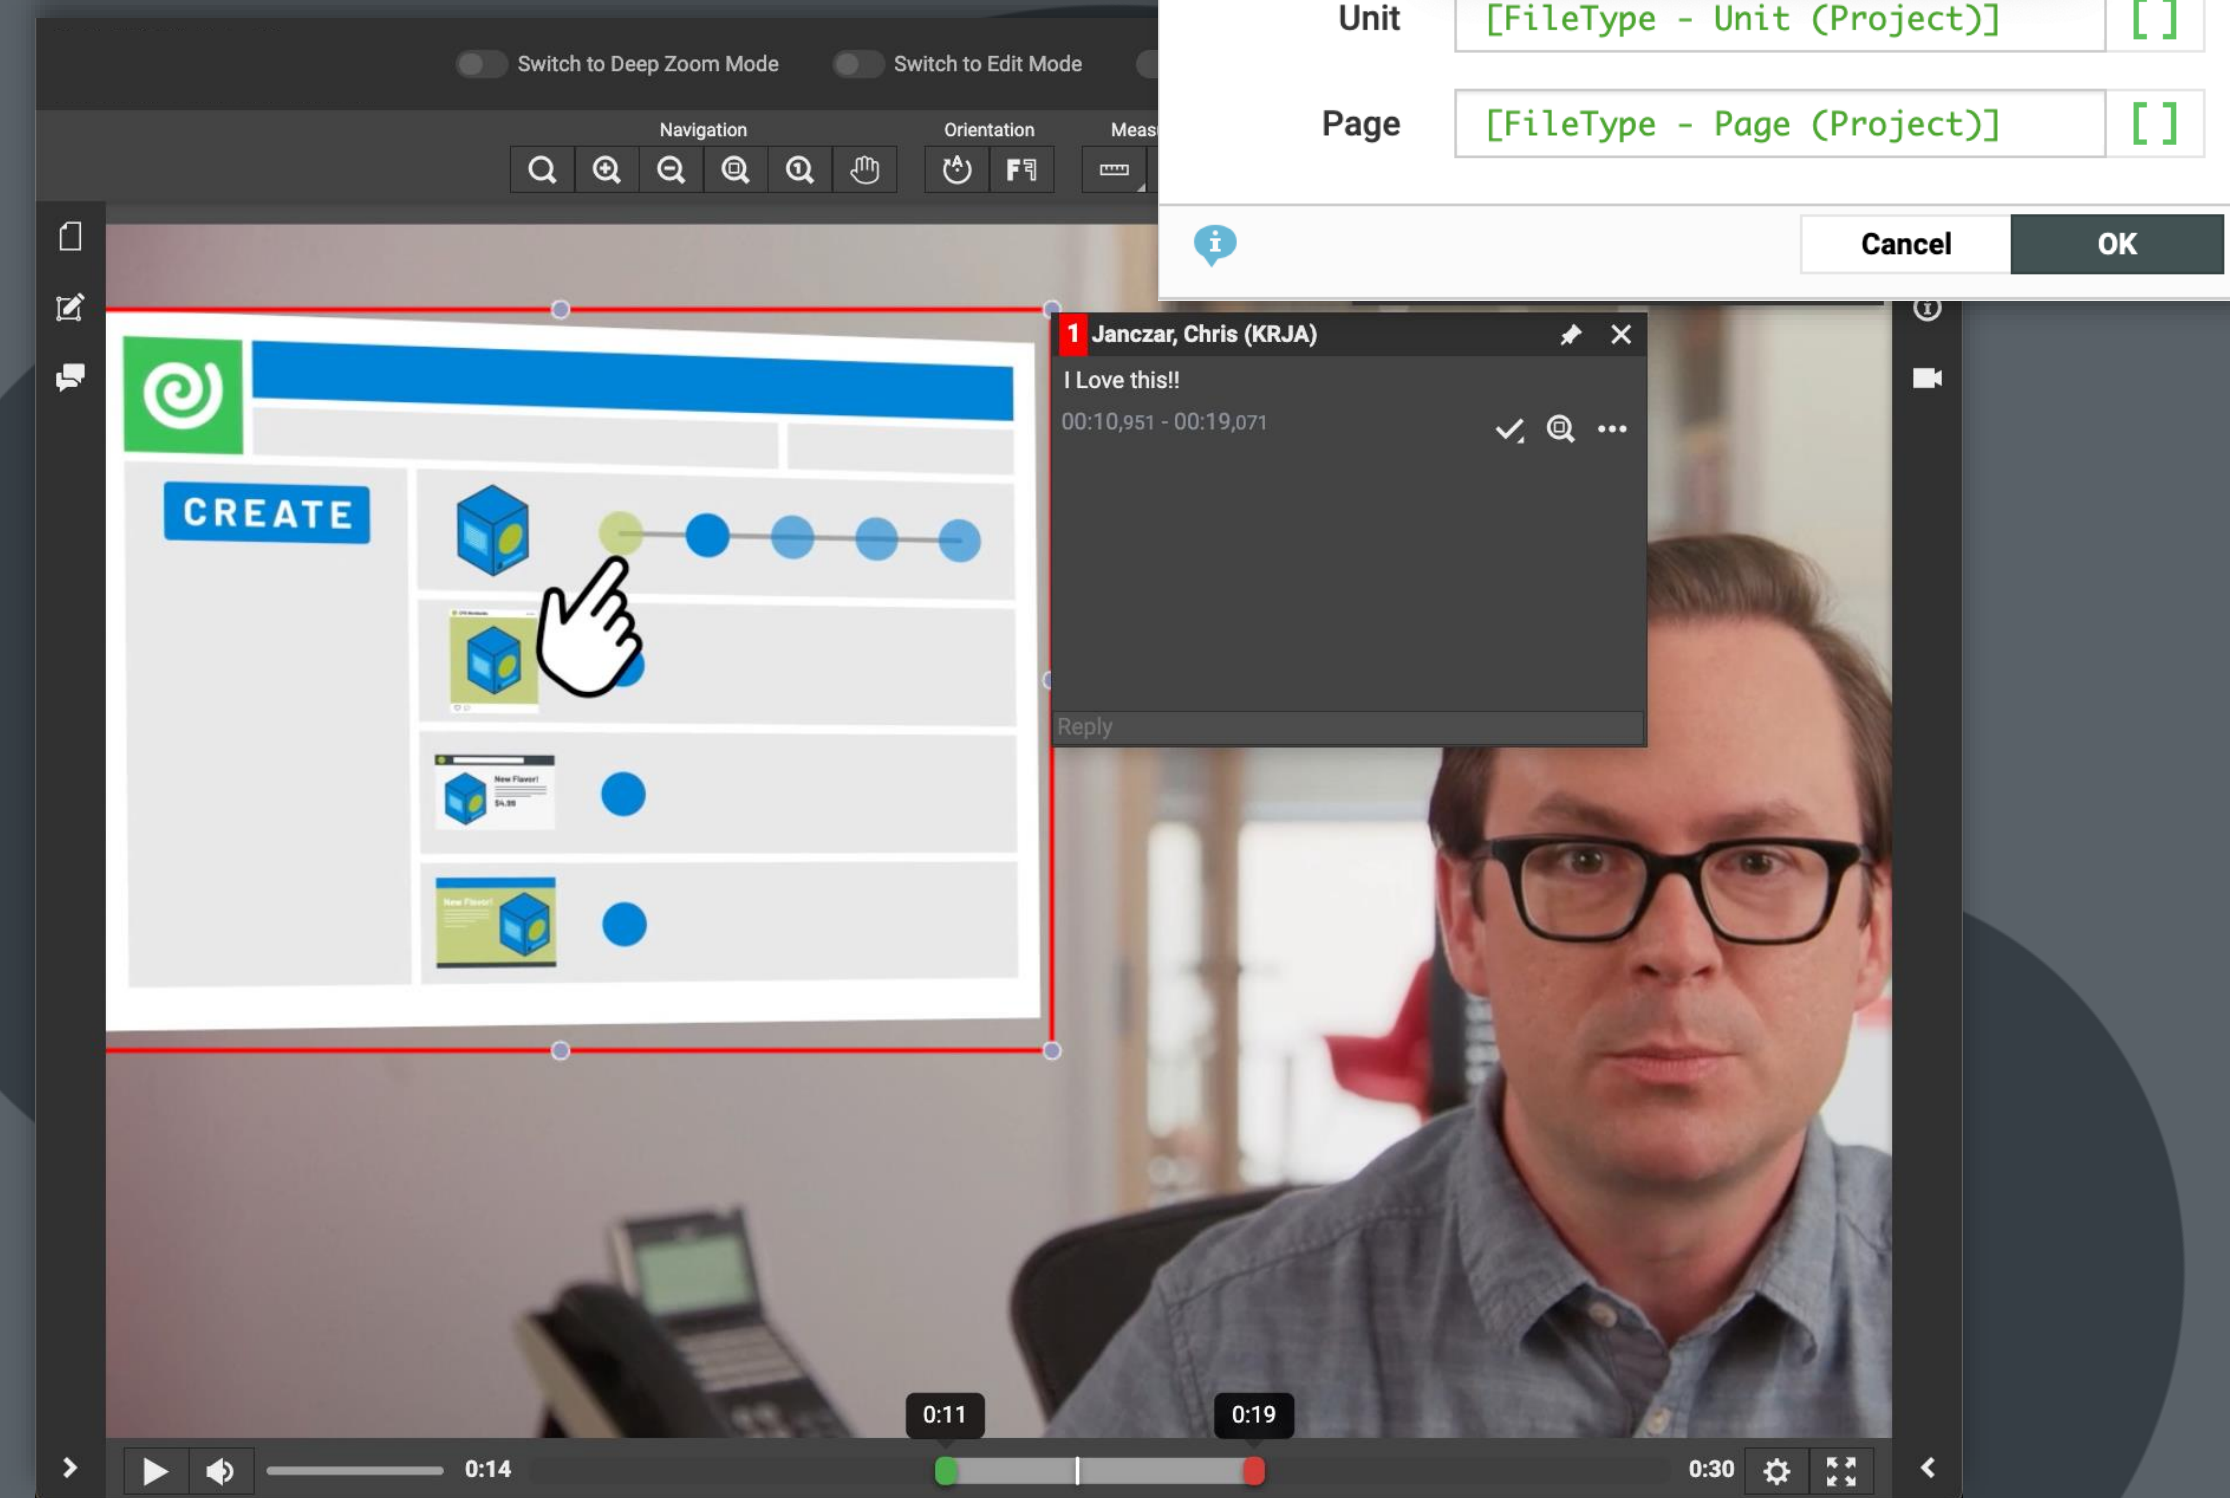

- **(23.03) New File Type Conversion Workflow Node***
- **(23.03) Blue/Green Deployment Support***
- **(22.11) Deep Zoom Mode Available for all SaaS Customers***

- **(22.07) Quality Control Widget in Deep Zoom Mode***
- **(22.03) Embedded Color Profile Viewing introduced in Deep Zoom Mode***
- **(22.07) Storage capabilities in STFS and AWS S3**

*\* SaaS Installations Only*

# Configuration Simplification

*Configure and administer WebCenter easier, faster and with less clicks.*

- **(23.07) Named Configurations (Import/Export)**
  - *With Named Configuration, you can easily create and organize collections of configuration items, including templates, task types, categories, searches, menus, and more.*
  - *Say goodbye to manual merging and complex transfer processes between systems. Named Configuration allows you to seamlessly import and export configurations, making maintenance and deployment a breeze.*

- **(23.07) Improved Attribute Labels**
  - *When configuring attributes and specifications, you'll now see clear indications specifying whether an attribute belongs to a project, document, or task. Furthermore, both the attribute name and label are prominently displayed, ensuring absolute clarity and reducing the likelihood of errors.*

*Named Configurations*

- (23.03) New Feature! Identify and work with Named Configurations
- (23.03) More Flexible Invite Member Node
- (23.03) Page Builder Improvements
- (22.11) Call External API from within the workflow canvas
- (22.11) Restrict Value of attributes via another attribute

- (22.11) Bearer token authentication added to external API connections
- (22.03) Migration Tools Enhancements
- (22.03) Dashboard Integration Connection
- (22.03) Visibility Rules Enhancements

**ESKO**

# Scalability & Performance

*Work in WebCenter with more teammates on more projects with the best performance possible.*

- (23.07) Cleanup Tool Performance Improvement
  - *Time is of the essence for our users. That's why we have made it a top priority to enhance the speed and efficiency of the Administrative Database Cleanup Tool. With this latest improvement, you can now experience significantly reduced processing times, allowing you to complete your cleanup tasks in a fraction of the time it used to take.*
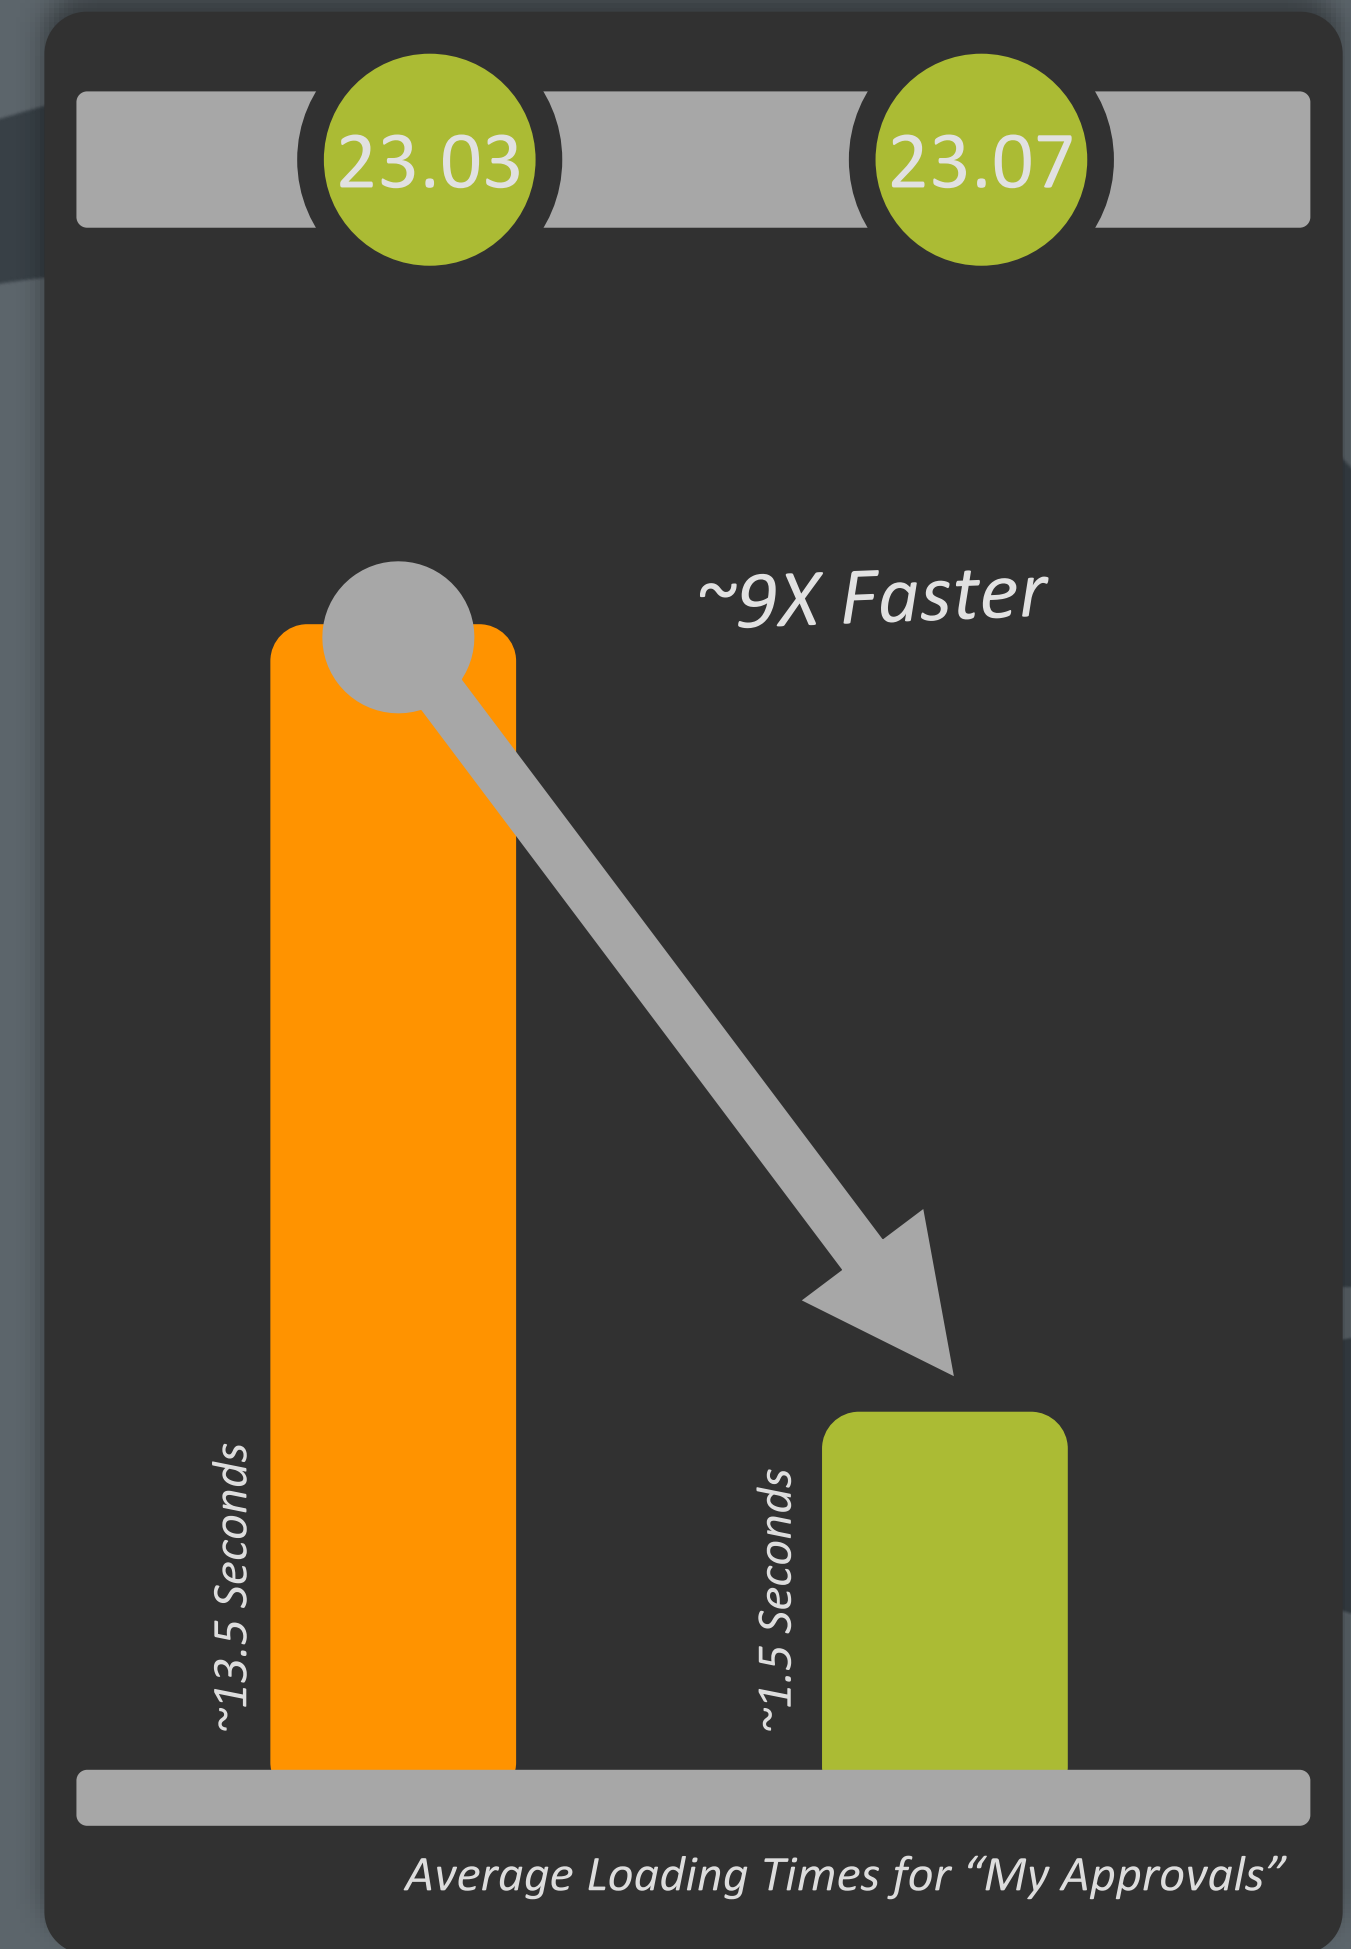

- (23.07) User Todo Page Loading Performance
  - *Significant improvement to the loading performance of the My Tasks and My Approvals sections on the My Work page in WebCenter. With this enhancement, you can now experience significantly faster loading times, providing a smoother and more efficient user experience.*

- (23.03) Improved Workflow Node Performance
- (23.03) Other Performance Improvements
- (22.11) Improved Page Loading Experience
- (22.11) Increased Performance on bulk content copy
- (22.07) Search crawler "Fast crawl" mode

- (22.07) Render optimizations for complex content sheet dashboards
- (22.07) Improved workflow performance
- (22.03) Workflow Performance Enhancements
- (22.03) Cleanup Tool Optimization

# Plug-ins for Adobe®

- **(23.07) Annotation Overlay**
  - *Say goodbye to the time-consuming and screen-cluttering process of reviewing and incorporating comments on separate windows. With Annotation Overlay, designers can now effortlessly overlay PDF annotations on top of their original AI files, streamlining the feedback process like never before.*
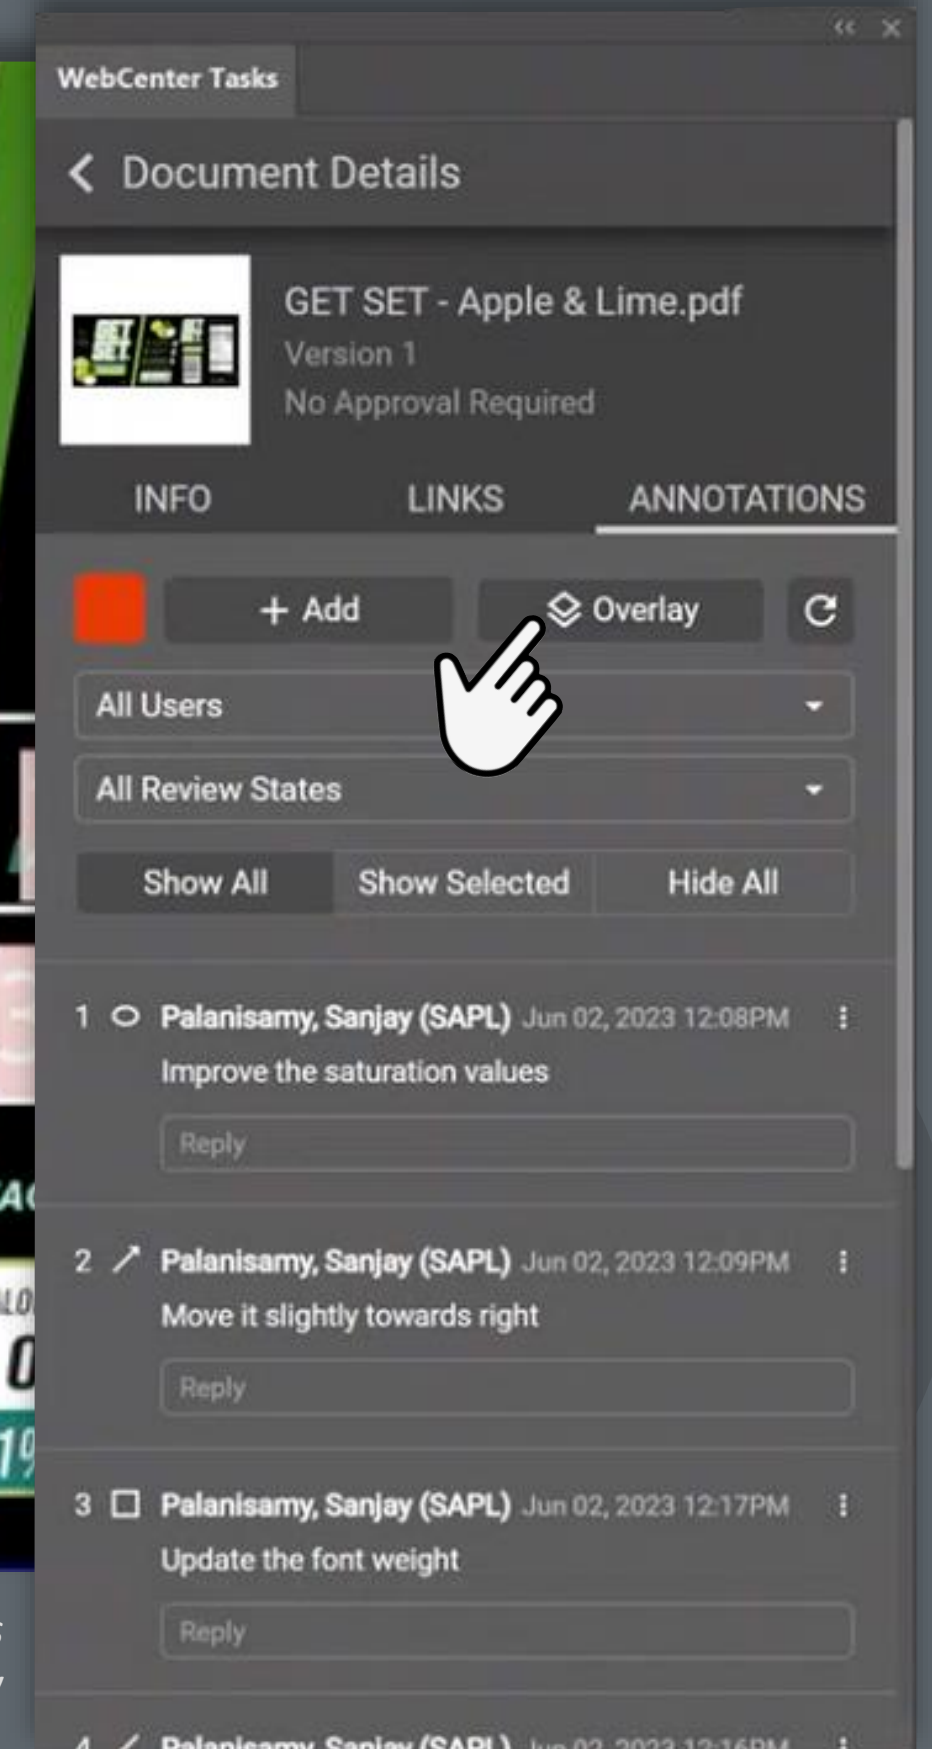

- **(23.07) Support for All Annotation Types**
  - *In addition to the existing rectangle annotations, WebCenter now supports a range of new annotation types, including Oval, Line, Arrow, and Freehand annotations, empowering you with even greater flexibility and creativity in your feedback and collaboration process.*

- **(23.07) Annotation Author Visibility**
  - *The author of each annotation is now displayed alongside the annotation itself on the artwork, providing valuable context and improving collaboration and communication.*

- **(22.03) Task Plugin: Improved SSO (SAML) Authentication Support**

*Support for All Annotation Types*
*Annotation Author Visibility*

*Annotation Overlay*

- The Task Plugin is available for download here: https://www.esko.com/en/support/downloadsandlicenses/free-software
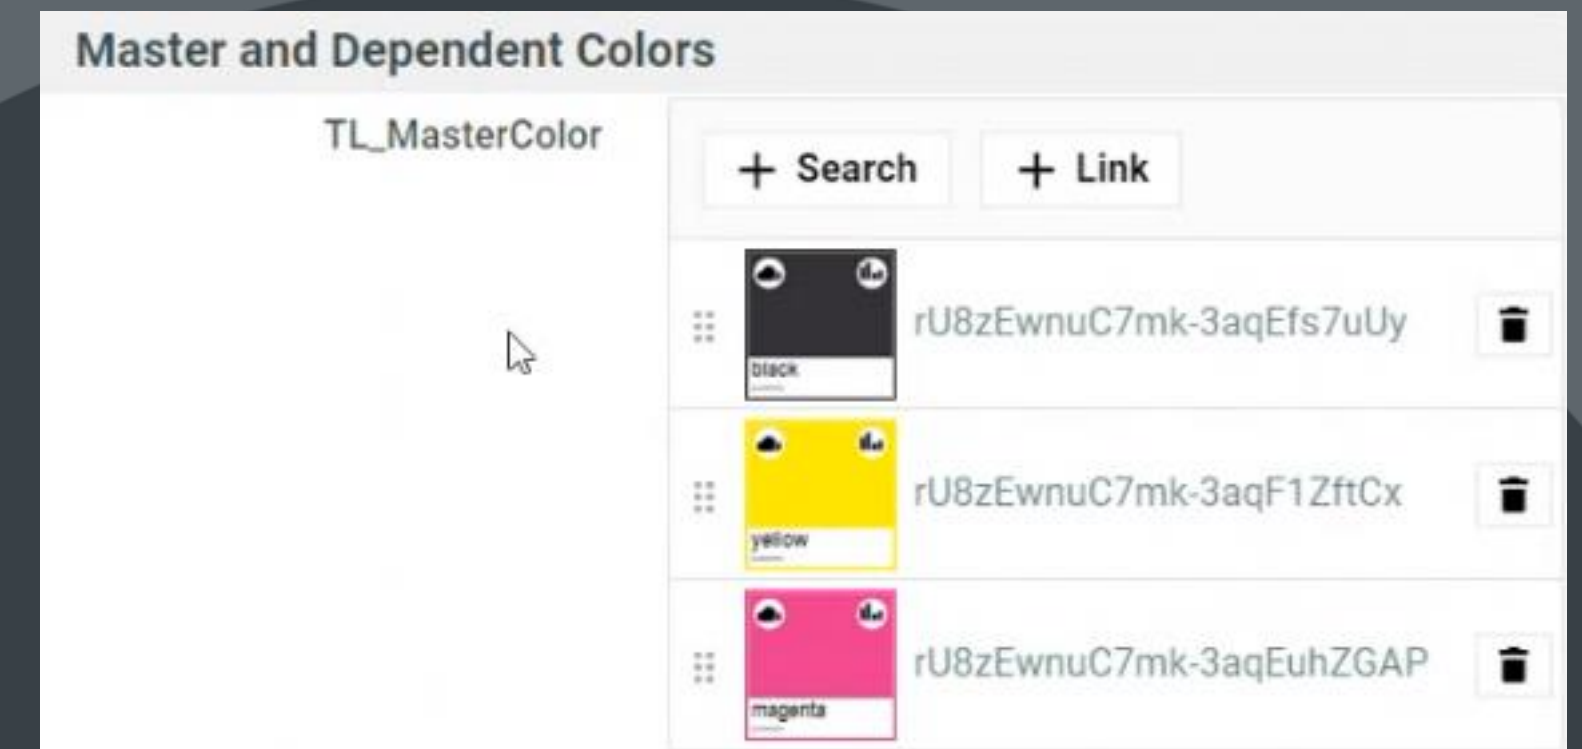

# Color Management

*Powerful Color Management Solution within WebCenter*

▪ **(23.07) ColorCert Job Output Improvements**
  ▪ *Color strip output now respects the order of colors in WebCenter from top to bottom.*

▪ **(23.07) Pantone Live Color Book Renaming Improvements**
  ▪ *WebCenter now correctly recognizes and updates renamed book names when synchronizing colors from the cloud.*

▪ **(23.07) Color Thumbnail Regeneration on Update**
  ▪ *WebCenter can now trigger the creation of a new document thumbnail based on the updated color attributes, using a new JS API call.*

▪ (22.03) Cloud Viewer Embedded Color Profile Viewing*
▪ (22.03) Custom Curve Value Configuration Options
▪ (22.03) Autoload Inks Feature
▪ (22.03) Autoload gray balances from color profile

*ColorCert Job Output Improvements*

*Color Thumbnail*

# General Enhancements

- **(23.07) Administrator Group Rights**
  - *With our enhanced feature, allocating administrative rights has never been easier. Now, administrators can precisely assign specific admin permissions to user groups. No more settling for an all-or-nothing approach. You have the power to tailor admin access according to your needs!*

- **(23.07) Expanded Keyword Search**
  - *With Expanded Keyword Search, we have introduced the highly requested feature of searching for documents and tasks using Project Keywords. Now, finding the documents and tasks you need is easier and more versatile than ever before. Quickly locate the relevant documents that match your specific criteria. Whether you're searching by project name, tags, or any other keyword, WebCenter has got you covered.*

- **(23.07) Audit Trails: Inclusion of Old Metadata Values**
  - *WebCenter takes transparency and traceability to a whole new level. When attributes are modified, the audit trail provides you with a comprehensive record that not only showcases the new values but also displays the corresponding old values. This valuable information allows you to understand the full context of the changes made, facilitating a more informed decision-making process.*
  - *Applies to project and document attributes as well as task specifications.*

- **(23.07) Document Template Improvements**
  - *More control and flexibility when it comes to choosing document templates in the UI/Dashboard framework. In previous versions, the default behavior was to automatically select a template that matched the file extension of the uploaded document. However, we have now expanded the options, allowing you to name a specific template or even choose not to use a template at all.*

- (23.03) Saved Search Export can now be canceled.
- (23.03) New Progress Bar Visible When Saving Forms
- (23.03) New File Type Conversion Workflow Node*
- (22.11) Improved List Look-up Feature
- (22.11) Chili Integration Improvements
- (22.11) Improved Options for Approving Documents Outside the Viewer

- (22.07) Updated Oracle Database Support to Version 19C
- (22.07) Ability to use S3 as a storage location
- (22.07) WebCenter Web Server Tomcat Update
- (22.03) Named User License Simplification
- (22.03) Color: Curve Value Configuration & Auto Load Options

# Content Management for Packaging *(formerly Packaging Content Management)*

*Produce error free packaging by standardizing the content collection process and to automate the flow of content into artwork.*

- **(23.07) Content Sheet Approval**
  - *Approving content is all about context. In this release, you can now review, comment, and approve content sheets natively in the system without needing a report. No more reports!*

- **(23.03) Nutrition Facts Handling**
  - *Nutrition Facts is as much about layout as it is about content - it's vital that you have clarity over what values go where. In this release, we've improved both the layout and the experience of editing content. Clarity will be yours!*

- (23.03) Export Content Sheets to Excel
- (23.03) Global Content Permissions
- (22.11) Interface improvements
- (22.11) Language context for dashboards
- (22.11) Allow text statement version updates in dashboard

- (22.11) Improve performance for large content sheets
- (22.11) Chili Cloud support
- (22.07) Flexible Master Language
- (22.07) Improved Dashboard JS API
- (22.07) Improved Save (Performance)

ESKO

# Content Management for Life Sciences *(formerly Structured Content Management)*

*Standardizing the process to define and approve document content and automating the flow of content into output templates.*

- (23.07) Improved Loading for Documents in Editor
  - *Enabling a good reuse model for structured content documents can require hundreds of different components to be loaded to read a document in the Editor. Now, you can get to reading up to 3x faster with "Just-in-Time" loading, where it loads the document while you read it.*

- (23.07) Show Outdated Content References in Outline
  - *Knowing which outdated references need reviewing is critical to realizing the value the reuse of structured data brings. In this release, we provide serenity by completing this journey, now including not just reused topics, but content reused from within.*

Over **3x** Faster Loading

6 documents loaded so far...

- (23.03) Previewing Structured Content
- (23.03) Transfer Output Styles automatically to InDesign Leaflets
- (23.03) Toggle Whitespace in the Editor
- (22.11) Allow copying of artwork tags between maps
- (22.11) Include changes from the previous version when preparing submissions
- (22.11) Continuing to improve and simplify the user experience

- (22.11) Notify editors when source content has been updated
- (22.11) Allow users to see source content when editing a translation
- (22.11) Support for wider variety of Word output formats
- (22.07) Compare Content Maps
- (22.07) Granular Tagging (finer control of placement in InDesign)
- (22.07) Editor (Fonto) Improvements
