

# What's New in WebCenter 25.03

Confidential - Company Proprietary

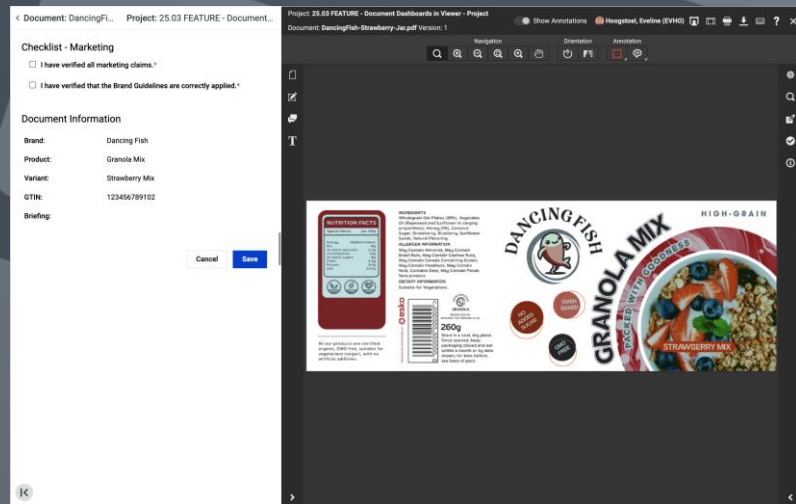

# Viewer

Review artwork files with accuracy

- (25.03) Document View in the Viewer
  - Document Dashboards in the Viewer provide reviewers with instant access to essential document information. This feature ensures all necessary details are readily available without leaving the Viewer.
- (25.03) Download from the Viewer
  - Users can now directly download Documents without leaving the Viewer.
- (25.03) Misregistration Quality Tool
  - Simulate and assess the impact of misregistration on the final print using the Misregistration Quality tool in the Viewer (available in Deep Zoom mode). This tool helps to identify potential issues, ensuring high-quality print results.

Document View in the Viewer

# User Interface & Experience

Complete work faster with a powerful and intuitive user interface

- (25.03) Live Filter and Sorting of Document References
  - Document Reference tables have now sort and filter options. By applying filters on the columns, users can efficiently locate the necessary documents, making it easier to find and inspect Document values.
- (25.03) Improved Scripting Performance
  - Users can now experience significantly improved performance when running dashboard scripts that load large amounts of data. This enhancement ensures that scripts processing data in loops execute much faster, reducing delays in dashboard validation and improving overall system responsiveness.

xxx

# Named Configuration Management

*Testing and updating WebCenter with specialized tools*

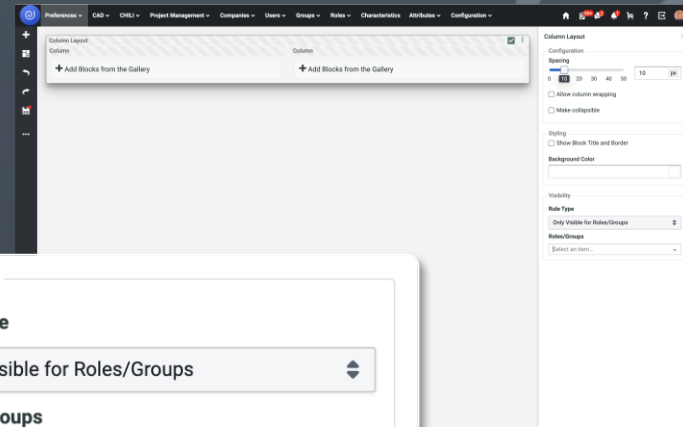

- (25.03) Improved Named Configuration Management
  - *Named configuration management now provides real-time visibility into changes, helping admins make informed decisions during configuration adjustments.*
- (25.03) Migrate Groups with Admin Rights
  - *Admins can now seamlessly migrate Groups with Admin Rights while preserving permission settings, ensuring a smooth migration between systems.*

# Configuration Enhancements

Configure and administer WebCenter easier, faster and with less clicks

- (25.03) Visibility Rules for Dashboard Blocks
  - Configure Dashboard forms and pages to appear differently (visible, editable, or hidden) for different roles without writing any scripts. This feature simplifies the process of setting visibility rules on Dashboard Blocks, making it more accessible and efficient for admins.
- (25.03) Selective Triggers for Project Rules
  - Trigger specific project status or attribute changes based on predefined conditions in the Rule Engine. This enhancement reduces unnecessary processing and ensures that only relevant updates are executed, improving system efficiency.
- (25.03) Document Reference API in Dashboards
  - Add, remove, update to latest, or replace documents in a Document Reference Attribute with ease. The API also allows copying documents or creating new ones based on Document Templates, enhancing flexibility and efficiency in configuring smart dashboard forms.
- (25.03) List Data API in the JS Workflow Node
  - A new method was added to the Workflow JavaScript API “getListDataRows”. This method can be used to load data from a WebCenter List. More information about the new method can be found in the Workflow JavaScript API documentation.

Visibility Rules for Dashboard Blocks

HISTORY:(24.11) Scripted Lists (24.11) Script Manager in Dashboard Builder (24.07) Improved JavaScript Rule Creation (24.07) Synchronize Project Attributes to Task Specifications (24.07) Forms for completed Tasks are now fully read only (24.03) Enhanced Workflow Editor; Direct Access to Task Types and Sub-Workflows (24.03) Task Creation from Dashboard (24.03) Automatically Populate Document Reference Forms (24.03) Automatically Populate Project and Task Forms (24.03) Customizable Document Viewer Modes (24.03) Enhanced Named Configuration Migration and Management

# General Enhancements

- (25.03) Project History Report
  - Admins can now view a comprehensive history report that consolidates all user activities across different projects into a single page. This improvement simplifies tracking, making it easier to trace actions across multiple projects without switching between individual history pages.
- (25.03) Proof Report
  - The Proof Report in WebCenter consolidates approval, annotation details, and metadata of a document into a single report, ensuring that all aspects of the document approval process are well-documented and easily accessible.
- (25.03) User Search
  - Quickly find users across the system with the improved User Search functionality. This enhancement allows admins to filter, export and manage user accounts efficiently, reducing the time spent navigating complex user lists.

The screenshot displays a 'Proof Report' for a document titled 'DancingFish-Mango&Strawberry-Front Label.pdf'. The report is organized into several sections:

- Approval status:** A table showing the document's progress through two stages. Stage 1, 'Project Manager Sign-off', was approved by Ramos, Izzy (SRAM) on Mar 14, 2025 at 11:59 AM. Stage 2, 'Regulatory', was approved by Smith, David (DASM) on Mar 14, 2025 at 1:51 PM.
- Document details:** Includes the project name, document description, version (4), and version ID (00002\_0000259770).
- Approval state:** Shows the document is 'Approved' on Mar 14, 2025 at 1:56 PM CET.
- Downloaded by:** Hoogstoel, Eveline (EVHO).
- Product Image:** A large image of the 'Dancing Fish Granola Mix' packaging, featuring a fish logo and the text 'HIGH-GRAIN' and '200g'.

At the bottom of the report, it states: '25.03 FEATURE: Proof Report, DancingFish-Mango&Strawberry-Front Label.pdf, Versions: 1-4'.

Proof Report

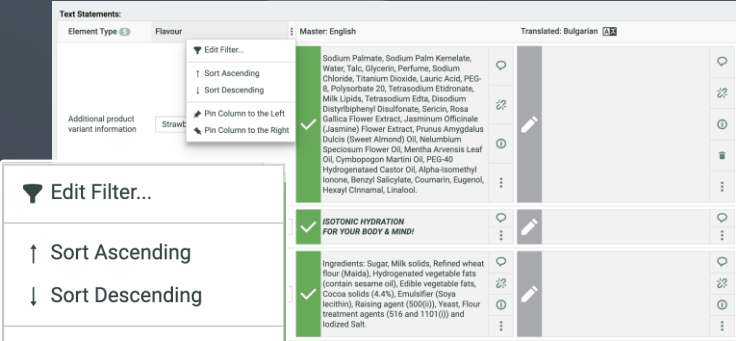

HISTORY: (24.11) Remember Pinned Columns State (24.11) Secure Download Link Support in Carts (24.11) Regenerate View Data Action (24.11) Proof Report (24.07) Pinned Columns via Configuration (24.07) Audit Trail for Lists (24.07) Duplicating Documents Triggers "On Document Added" Script (24.07) Expire My Sessions Enhancement (24.07) Allow calling local WebCenter SDK as current User and XML Support (24.03) Secure Download Link with Verification (24.03) Integration Capability with GlobalVision Verify (24.03) Search Text in Microsoft Office Documents (

# Content Management for Packaging

Produce error free packaging by standardizing the content collection process and to automate the flow of content into artwork

- (25.03) AI-Assisted Translations
  - Accelerate translations by leveraging Microsoft Azure AI. Content Managers can now generate multilingual content out-of-the-box, cutting costs and reducing turnaround times.
- (25.03) Filter and Sort Text statements in a Content Sheet
  - Content Editors can now easily filter and sort text elements by reference properties (for example, location on-pack, size, or component). This enhancement helps users focus on the relevant content items which boosts editing efficiency.

Element Type	Flavour	Master: English	Translated: Bulgarian
		<input checked="" type="checkbox"/> Sodium Palmitate, Sodium Palm Kernelate, Water, Talc, Glycerin, Perfume, Sodium Chloride, Titanium Dioxide, Lauric Acid, PEG-8, Polysorbate 20, Tetrasodium Edronate, Milk Lipids, Tetrasodium Edta, Disodium Diethylphosphoryl Disulfonate, Sericin, Rosa Gallica Flower Extract, Jasminum Officinale (Jasmin) Flower Extract, Prunus Amygdalus Dulcis (Sweet Almond) Oil, Nektarium Spicissimum Flower Oil, Mentha Arvensis Leaf Oil, Cymbopogon Martini Oil, PEG-40 Hydrogenated Castor Oil, Alpha-Isomethyl Isonone, Benzyl Salicylate, Coumarin, Eugenol, Hexyl Cinnamal, Linalool.	
		<input checked="" type="checkbox"/> ISOTONIC HYDRATION FOR YOUR BODY & MIND!	
		<input checked="" type="checkbox"/> Ingredients: Sugar, Milk solids, Refined wheat flour (Maida), Hydrogenated vegetable fats (contain sesame oil), Edible vegetable fats, Cocoa solids (4.4%), Emulsifier (Soya lecithin), Raising agent (550/01), Yeast, Flour treatment agents (516 and 1101/01) and Iodized Salt.	

Filter and Sort Text statements in a Content Sheet

# Content Management for Life Sciences

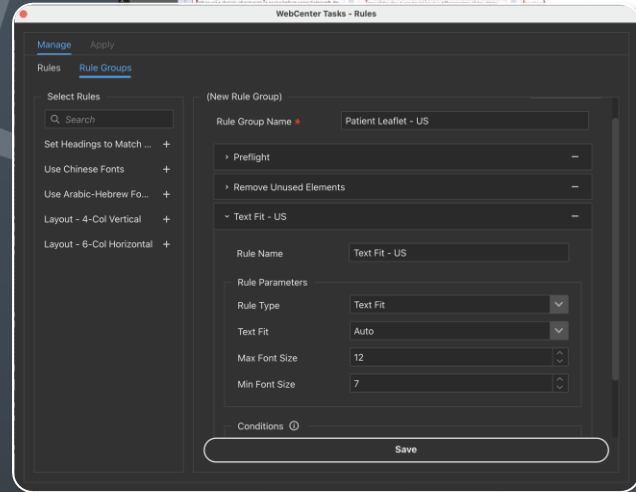

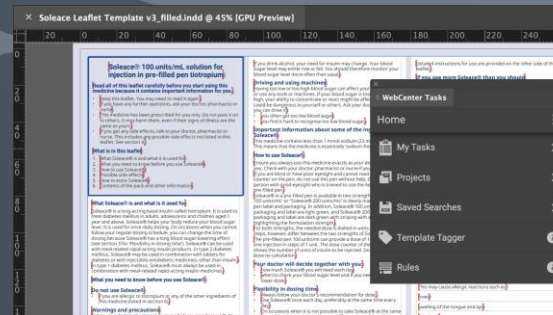

Standardizing the process to define and approve document content and automate the flow of content into output templates

## ■ (25.03) InDesign Previewer Enhancements

- Leaflet Authors receive notifications when edited text exceeds its frame capacity, preventing important information from going off-page.
- Artwork Managers can now select from different layout orientations (e.g., horizontal or vertical) within the Viewer. This flexibility maximizes template usefulness, making it easier to tailor a single template for multiple design needs.

## ■ (24.11) WebCenter Tasks Plugin [InDesign] – Rules

- Template Designers can now enforce detailed design constraints in InDesign—such as font size limitations and table formatting.
- Reuse template rules across multiple InDesign templates. Template Designers can now export and import rules, eliminating repetitive setup and ensuring consistency and efficiency during template creation.
